Nontemporary Storage (NTS) Program

AGENCY: Military Traffic Management Command (MTMC), DOD.

ACTION: Notice.

SUMMARY: Provide notification of MTMC's intent to increase warehouseman's legal liability from the current \$50 per article or package to \$1.25 times the net weight (in pounds) of the shipment. The increase in liability will be reflected in a change to paragraphs H-6 and C-7h(2) of the Basic Ordering Agreement (BOA) for Storage of Personal Property and Related Services. The increased liability is intended to improve the quality of service, especially in the area of missing items. This action has already been implemented for International Through Government Bill of Lading (ITGBL) shipments, and domestic interstate and intrastate shipments. This action will provide the military service claims offices more equitable recovery of amounts due for personal property lost or damaged while in NTS. The current process for processing claims will remain the same. Contractors will be given the opportunity to submit new NTS rates prior to implementation of this change to the terms and conditions of the BOA. Implementation is scheduled for 1 Nov 96. The following is the change, by paragraph, to the BOA.

Paragraph H-6a., First Sentence:

Liability for Care of Property

a. Except as hereafter provided, and notwithstanding payment for storage and other services, the contractor shall be liable in an amount not exceeding \$1.25 times the net weight (in pounds) of the shipment for any loss or damage to personal property caused by the failure to exercise the care of a reasonably prudent owner of similar property. The contractor shall not be liable for any loss or damage to the personal property which is caused by acts or conditions beyond its control and without fault or negligence.

Paragraph C-7h(2);

Maintain coverage in minimum limits of \$1.25 per pound at each location.

Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Plasma ARC Hazardous Waste Treatment Facility, Naval Base Norfolk, Virginia

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR Parts 1500-1508), the Department of the Navy announces its intent to prepare an Environmental Impact Statement (EIS) to evaluate the potential environmental effects of a proposed Plasma Arc Hazardous Waste Treatment Facility (PAHWTF) at Naval Base Norfolk, Virginia.

A PAHWTF uses a thermal process for treating solid and hazardous waste. The system employs extremely high temperature (10,000 to 30,000 °F) from a plasma arc torch to destroy organic waste and change or fuse solid or hazardous waste into a glass-like, nonleachable substance, a process known as vitrification. A typical PAHWTF consists of a feeder system, primary combustion chamber, secondary combustion chamber, off-gas treatment system, and slag collection chamber. This technology has existed for over 20 years, and initially was used for simulation of high thermal loads encountered by spacecraft during atmospheric reentry. The process has been successfully used to treat contaminated soil and several different hazardous waste streams. The technology has also been used for applications such as refining and recovery of metals.

During the first 12 to 18 months following installation, the PAHWTF
