

Television Association, Inc. The second petition was filed by Program Suppliers, Joint Sports Claimants, the National Association of Broadcasters, Music Claimants (the American Society of Composers, Authors and Publishers, Broadcast Music, Inc., and SESAC, Inc.), Canadian Claimants, Devotional Claimants, the Public Broadcasting Service and National Public Radio (collectively, the "Copyright Owners"). Copyright Owners' petition at 1.

III. Negotiation Period and Notices of Intent to Participate

As discussed above, the Library of Congress rules provide a 30-day negotiation period prior to the filing of rate adjustment petitions to enable the parties to settle their differences. 37 C.F.R. 251.63(a). In accordance with this rule, the Library is designating the thirty day period to commence on April 15, 1996, and close on May 15, 1996. If settlement is not reached during this time period, those parties wishing to participate in a rate adjustment proceeding before a CARP must file a Notice of Intent to Participate no later than close of business on May 20, 1996. Failure to file a timely Notice of Intent to Participate will preclude a party from participating in the proceeding.

[Docket No. 50-029; License No. DPR-3]

Yankee Atomic Electric Company; Issuance of Supplemental Director's Decision Under 10 CFR 2.206

Notice is hereby given that by a Director's Decision (DD 96-02), dated March 18, 1996, the Director, Office of Nuclear Reactor Regulation, denied a supplemental Petition submitted by Citizens Awareness Network and New England Coalition on Nuclear Pollution (Petitioners) and dated February 9, 1996. Petitioners requested that the Nuclear Regulatory Commission (NRC) take action with regard to operation by Yankee Atomic Energy Company (YAEC or Licensee) of its Nuclear Power Station at Rowe, Massachusetts (Yankee Rowe).

Petitioners request that the NRC comply with *Citizens Awareness Network Inc. v. United States Nuclear Regulatory Commission and Yankee Atomic Electric Company*, 59 F.3d 284 (1st Cir. 1995) (*CAN v. NRC*). Specifically, Petitioners request that the Commission prohibit the licensee from conducting six activities prior to approval of a decommissioning plan. These activities are: (1) Consolidation of sediment in the reactor vessel; (2) removal of miscellaneous Safety Injection Building equipment; (3) installation of a temporary electrical system; (4) removal of pipe on the exterior of the Vapor Container; (5) removal of Main Coolant System insulation; and (6) installation of a temporary waste processing system. Petitioners state that none of these activities constitute minor alterations to the facility, and thus are not permitted.

The NRC staff also evaluated five other ongoing or planned activities at Yankee Rowe that were identified in the licensee's letters of January 29, 1996, February 16, 1996, and February 28, 1996. These activities are: (1) Preparation for decontamination of the Main Coolant System—removal of spool pieces; (2) removal of miscellaneous equipment outside the Vapor Container bioshield wall; (3) removal of Primary Auxiliary Building tanks; (4) removal of Turbine Building insulation; and (5) removal of spent fuel pool upender.
