NUCLEAR REGULATORY COMMISSION

**Agency Information Collection
Activities: Proposed Collection;
Comment Request**

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: 10 CFR Part 32, "Specific

Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material.”

3. The form number if applicable: Not applicable.

4. How often the collection is required: There is a one-time submittal of information to receive a license. Renewal applications are submitted every 5 years. In addition, recordkeeping must be performed on an on-going basis, and reports of transfer of byproduct material must be reported every 5 years.

5. Who will be required or asked to report: All specific licensees who manufacture or initially transfer items containing byproduct material for sale or distribution to general licensees or persons exempt from licensing.

6. An estimate of the number of responses: 5,462 responses from NRC licensees and 8,039 responses from Agreement State licensees.

7. The estimated number of annual respondents: 265 NRC licensees and 333 Agreement State licensees.

8. An estimate of the total number of hours needed annually to complete the requirement or request: 53,333 hours or 201 hours per NRC licensee and 95,307 hours or 286 hours per Agreement State licensee. The difference in individual licensee burden between NRC and Agreement States is due to the fact that a higher percentage of the Agreement State licensees are nuclear pharmacies, which have a large recordkeeping burden because of the labeling requirements for radiopharmaceuticals.

9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: 10 CFR Part 32 establishes requirements for specific licenses for the introduction of byproduct material into products or materials and transfer of the products or materials to general licensees or persons exempt from licensing. It also prescribes requirements governing holders of the specific licenses. Some of the requirements are for information which must be submitted in an application for a specific license, records which must be kept, reports which must be submitted, and information which must be forwarded to general licensees and persons exempt from licensing. In addition, 10 CFR Part 32 prescribes requirements for the issuance of certificates of registration (concerning radiation safety information about a product) to manufacturers or initial transferors of sealed sources and devices. Submission or retention of the information is mandatory for persons subject to the 10 CFR Part 32 requirements. The information is used

by the NRC to make licensing and other regulatory determinations concerning the use of radioactive byproduct material in products and devices.

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC. Members of the public who are in the Washington, DC, area can access the submittal via modem on the Public Document Room Bulletin Board (NRC's Advance Copy Document Library) NRC subsystem at FedWorld, 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 1-800-303-9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The document will be available on the bulletin board for 30 days after the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703-487-4608. Additional assistance in locating the document is available from the NRC Public Document Room, nationally at 1-800-397-4209 or, within the Washington, DC, area, at 202-634-3273.

Comments and questions should be directed to the OMB reviewer by May 6, 1996: Peter Francis, Office of Information and Regulatory Affairs (3150-0001), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 415-7233.

Dated at Rockville, Maryland, this 29th day of March, 1996.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-P

[Docket Nos. 50-133, 50-275 and 50-323]

Pacific Gas and Electric Company; Humboldt Bay Power Plant, Unit 3; Diablo Canyon Nuclear Power Plant, Units 1 and 2

Notice is hereby given that the United States Nuclear Regulatory Commission (the Commission) is considering approval under 10 CFR 50.80 of the proposed corporate restructuring of Pacific Gas and Electric (PG&E), the licensee for Humboldt Bay Power Plant, Unit 3 and Diablo Canyon Nuclear Power Plant, Units 1 and 2. By letter dated November 1, 1995, PG&E informed the Commission that a corporate restructuring of PG&E has

been proposed that will result in the creation of a holding company under the name PG&E Parent Co., Inc. ("Parent Company") of which PG&E would become a wholly-owned subsidiary. PG&E will remain holder of its licenses for Humboldt Bay Power Plant, Unit 3 and Diablo Canyon Nuclear Power Plant, Units 1 and 2. Under the restructuring, the holders of PG&E common stock will become the holders of common stock of the holding company on a share-by-share basis. After the restructuring, PG&E will continue to be a public utility providing the same utility services as it did immediately prior to the reorganization. According to the proposed plan, there will be no significant change in ownership, management, or sources of funds for operation, maintenance, or decommissioning of the Humboldt Bay Power Plant, Unit 3 and Diablo Canyon Nuclear Power Plant, Units 1 and 2 due to the corporate restructuring.

Pursuant to 10 CFR 50.80, the Commission may approve the transfer of control of a license after notice to interested persons. Such approval is contingent upon the Commission's determination that the holder of the license following the transfer is qualified to have control of the license and that the transfer of such control is otherwise consistent with applicable provisions of law, regulations, and orders of the Commission.

For further details with respect to this proposed action, see the licensee's letter dated November 1, 1995, with the following attachments: letter dated October 20, 1995, application filed before the Public Utilities Commission of the State of California from Harry W. Long, Jr. and Pilar Garcia, attorneys for Pacific Gas and Electric Company, and Testimony of Kent M. Harvey (Exhibit PG&E-1) and Keith O. Fukui (Exhibit PG&E-2). These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, N.W., Washington DC, and at the local public document rooms located at Humboldt County Library, 1313 3rd Street, Eureka, California 95501 and at the California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Dated at Rockville, Maryland, this 29th day of March 1996.
