

Department should use the UPIS "U.S. Base Price Indicator" as one of the indicating variables for the long term price as opposed to the UPIS "Base Price Indicator," because the former represents U.S. utility purchases, while the latter represents purchases worldwide. As a result of the comment, we have used the UPIS "U.S. Base Price Indicator" in our calculation.

After analysis of the above comment, we have determined that the observed market price for uranium is \$12.25/lb. The Department invites parties to provide pricing information for use in the next price determination. Any such information should be provided for the record and should be submitted to the Department by September 5, 1996.
