Purpose

EPA is developing guidance documents and other tools as part of an effort to expand public participation and involve all stakeholders in EPA programs. Given that other organizations may have as much or more experience than EPA in certain facets of public participation (e.g., community organizing, risk communication), we are soliciting public input into the formation of a public participation bibliography. This bibliography will identify documents and publications that may be useful to people who are involved in the RCRA permitting process. The Agency will make this bibliography available to all interested stakeholders by including it

on the Internet, in Agency publications, and in hard copy via the RCRA/Superfund Hotline or EPA offices. EPA intends that this bibliography will represent all points of view and be useful to all stakeholders in the permitting process.

If you would like to submit citations for publications related to public participation in RCRA permitting, please send them to the address above by the close of this comment period. Please do not send the original document, but provide an abstract if possible. There is no need to submit citations of EPA documents, since they will be included by the Agency.

Please provide the following information in your citations:

- *For all publications* include the full names of all authors, full titles, publisher, date of publication, city where the work was published, an abstract, and an address and/or phone number where one can write or call to obtain the publication (if applicable).

- *For magazine and journal articles* also include the volume of the magazine, the page number(s), and issue numbers.

In addition, include your phone number so that EPA staff can call with questions about your submissions. The submitter's name and phone number will not be published in the bibliography.

We are particularly interested in the following subject areas for inclusion in the bibliography: community organizing, community involvement and participation, environmental justice, risk communication, creative problem-solving, alternative dispute resolutions, participatory activities, environmental activism, and information-sharing. Other subject areas may be relevant as well. For this bibliography, we are not interested in technical documents or data related to permitting. EPA reserves the right to omit citations that do not meet the purposes of this bibliography.

Dated: April 2, 1996.
