

occurred since preparation of the 1983 FEIS, and the appropriate mitigation measures. These documents provide sufficient evidence and analysis for determining that a SEIS is not required. The FHWA takes full responsibility for the accuracy, scope, and content of the 1995 EA, Public Review and Comment Record, and the FONSI document. The FHWA reiterates its determination that there is no feasible and prudent alternative to the use of land from Anacostia and Garfield Parks, and that the proposed action includes all possible planning to minimize harm to these properties resulting from such use.

**SUPPLEMENTARY INFORMATION:** The basis for the 1996 FONSI for the proposed Barney Circle Freeway Modification Project is discussed in the document. It has been developed in compliance with the National Environmental Policy Act (NEPA). The Barney Circle Freeway Modification Project, as proposed by the District of Columbia Department of Public Works (DCDPW), completes a portion of the Interstate highway system in the southeast area of the District of Columbia. It would connect the Eisenhower Freeway (I-295) at Barney Circle with a logical terminus, via a 1.4-mile four-lane freeway and bridge, at the Anacostia Freeway. The goal of the project is to provide a direct link between central Washington, D.C., and areas to the northeast and east, and to divert through traffic from local streets to higher-capacity roadways. The 1995 Barney Circle Freeway Modification Project EA was prepared to determine if any new conditions, changes in government policy, or new environmental issues have occurred, since completion of the 1983 FEIS and the subsequent re-evaluations of the FEIS in 1989 and 1993, that would affect or modify the basis for FHWA's 1984 Record of Decision (ROD).

The FHWA has reviewed and analyzed available data and information on existing conditions, project impacts, and measures to mitigate those impacts, and the comments from the public and governmental agencies. The FHWA has determined that there are no new significant impacts that would require the FHWA to prepare a SEIS or to modify the 1984 ROD to construct the Selected Alternative, as proposed in the 1983 FEIS.

Major concerns addressed in the EA include: (1) the discovery of contaminated materials in the western section of the proposed freeway, (2) environmental justice, (3) cumulative impacts, and (4) the federal ecological management initiative. A summary discussion of each of these issues is presented in the FONSI document, which is available to the public for review. Comments or questions concerning the FONSI should be directed to the FHWA at the address provided above.
