Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget requests for approval of proposed new collections and proposed revisions on the following rules and forms:

Rules 101 and 102 would prohibit distribution participants from purchasing activities during a distribution of securities. These covered persons may seek to use an exception to this rule that would require such persons to calculate the average daily trading volume of the securities in distribution, maintain and audit a policy regarding information barriers between their affiliates, and maintain a written policy regarding general compliance with Regulation M. The Commission estimates that 1,597 respondents would collect information under Rule 101 and that approximately

43,522 hours would be required annually for these collections. In addition, the Commission estimates that 577 respondents would collect information under Rule 102 and that approximately 577 hours would be required for these collections.

Rule 103 provides an exception to Rule 101 for passive market making in Nasdaq securities. A distribution participant that seeks use of this exception would be required to disclose to third parties its intention to engage in passive market making. The Commission estimates that 375 respondents would collect information under Rule 103 and that approximately 375 hours would be required annually for these collections.

Rule 104 would permit stabilizing by a distribution participant during a distribution so long as the distribution participant discloses information to the market and investors. This rule requires disclosure in offering materials of the potential stabilizing transactions and to inform the market when a stabilizing bid is made. It also requires the distribution participants (*i.e.*, the syndicate manager) to maintain information regarding syndicate covering transactions and penalty bids. The Commission estimates that 522 respondents would collect information under Rule 104 and that approximately 522 hours would be required annually for these collections.

Rule 17a-2 requires underwriters to maintain information regarding stabilizing activities. This rule would be amended to reflect the new records required under proposed Rule 104. The Commission estimates that 522 respondents would collect information under Rule 17a-2 and that approximately 2,610 hours would be required annually for these collections.

Item 502(d) of Regulation S-K and Regulation S-B requires disclosure in offering materials of stabilization and passive market making. These provisions would be amended to require new wording of the legends already required. Item 508 of Regulation S-K and Regulation S-B requires disclosure in offering materials regarding underwriting activities. These provisions would be amended to require that potential stabilizing activities be described more fully. These amendments would affect the information required in Forms S-1, S-2, S-3, S-11, SB-1, SB-2, F-1, F-2, and F-3, which incorporate Items 502(d) and 508. The Commission estimates that each form would incur an additional .5 burden hour to comply with these revisions.
