

physically active people who are interested in health promotion, in improving their personal performance in recreational sports, or in reduction of general fatigue. The goal of the meeting is to develop a research agenda that will identify key areas warranting further investigation.

The workshop will bring together specialists in aging, human anatomical configurations, child development, clinical nutrition, cognitive science, dietary supplements, dietetics, endocrinology, exercise physiology, exercise science, growth and development, kinesiology, medicine, nutrition, nutritional biochemistry, pediatrics, physiology, sports medicine, and women's health issues. These scientists will present reviews of the current state of scientific knowledge regarding selected dietary supplements and physical activity. Although scientific studies in many of the areas to be addressed in this workshop have often necessarily included primarily studies of elite athletes, the focus of this workshop is on the more typical healthy person who is physically active.

Primary sponsors of this workshop are the Office of Dietary Supplements, NIH, in conjunction with the American Society for Clinical Nutrition and the American Institute of Nutrition. The workshop will be cosponsored by the NIH Office of Alternative Medicine; the National Heart, Lung, and Blood Institute; the National Institute on Aging; the National Institute of Arthritis and Musculoskeletal and Skin Diseases; the National Institute of Child Health and Human Development; the National Institute on Deafness and Other Communication Disorders; the National Institute of Dental Research; the National Institute of Diabetes and Digestive and Kidney Diseases; and the National Institute of Mental Health.

Advance information on the conference program and conference registration materials may be obtained from: Annette Besignano, Technical Resources International, Inc., 3202 Tower Oaks Blvd., Suite 200, Rockville, Maryland 20852, (301) 770-3153, confdept@tech-res.com.

The proceedings of this workshop will be published as a supplement to the American Journal of Nutrition.
