## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-397]

### Washington Public Power Supply System; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 145 to Facility Operating License No. NPF-21 issued to

Washington Public Power Supply System (the Supply System, or the licensee), which revised the Technical Specifications for operation of the Nuclear Project No. 2, located in Benton County, Washington.

The amendment is effective as of the date of issuance.

The amendment revised the technical specifications to reflect the replacement of the existing reactor recirculation (RRC) flow control system with an adjustable speed drive (ASD) system. In addition, the proposed technical specification changes will reflect replacement of the existing analog-hydraulic flow control system with dual channel, variable frequency ASDs and a digital recirculation flow control system that would vary RRC flow by varying RRC pump speed.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings are required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on March 4, 1996 (61 FR 8307). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see (1) the application for amendment dated October 26, 1995, as supplemented by letters dated March 12, 1996, May 8, 1996, and May 16, 1996, (2) Amendment No. 145 to License No. NPF-21, and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street N.W., and at the Richland Public Library, 955 Northgate Street, Richland, Washington 99352. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington D.C. 20555, Attention: Director, Division of Reactor Projects III/IV.

Dated at Rockville, Maryland, this 3rd day of June 1996.

### Washington Public Power Supply System; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Washington Public Power Supply System (WPPSS, the licensee) to withdraw its June 6, 1995, application for proposed amendment to Facility Operating License No. NPF-21 for the WPPSS Nuclear Project, Unit No. 2, located on the Hanford Reservation in Benton County, Washington.

The proposed amendment would have revised the technical specifications (TS) to add references to three topical reports describing analytical methods that may be used in determining reactor core operating limits for reload licensing applications.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on July 19, 1995 (60 FR 37101). However, by letter dated April 24, 1996, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated June 6, 1995, and the licensee's letter dated April 24, 1996, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Richland City Library, 955 Northgate Street, Richland, Washington 99352.

Dated at Rockville, Maryland, this 4th day of June 1996.

**NUCLEAR REGULATORY COMMISSION****Privacy Act of 1974, as Amended; Revisions to Existing System of Records**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Proposed revisions to an existing system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, as amended (Privacy Act), the Nuclear Regulatory Commission (NRC) is issuing public notice of its intent to modify an existing system of records (system), NRC-3, "Enforcement Actions Against Individuals—NRC," to expand the Categories of Individuals Covered and the Categories of Records Maintained in the system, to add one new routine use, and to revise two existing routine uses.

**EFFECTIVE DATE:** The revised system of records will become effective without further notice on July 22, 1996, unless comments received on or before that date cause a contrary decision. If changes are made based on NRC's review of comments received, NRC will publish a new final notice.

**ADDRESSES:** Send comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Docketing and Services Branch. Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland, between 7:30 am and 4:15 pm Federal workdays. Copies of comments may be examined, or copied for a fee, at the NRC Public Document Room at 2120 L Street, NW., Lower Level, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Jona L. Souder, Freedom of Information/Local Public Document Room Branch, Division of Freedom of Information and

Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-7170.

**SUPPLEMENTARY INFORMATION:** The NRC is proposing to amend the system notice for NRC-3, "Enforcement Actions Against Individuals—NRC," to add "individuals involved in NRC-licensed activities who have been the subject of correspondence indicating that they are being, or have been, considered for enforcement action" as a new category of individuals covered by the system. NRC-3 currently covers only those individuals who have actually been subject to NRC enforcement actions. In addition, while the current categories of records in the system include Letters of Reprimand, NRC-3 does not include other letters such as those concerning matters that are being or have been considered for individual enforcement action and those that reflect on an individual's performance concerning a particular matter. These letters, which are necessary in deciding whether enforcement action should be taken against an individual, determining whether repetitive performance problems are occurring, and tracking actions considered and taken, are being added to the categories of records maintained in the system.

Existing routine use b. is being amended to include several additional means of making certain information routinely available to the public in an effort to deter future violations of NRC regulations.

Existing routine use e. is being redesignated f. and is being revised to include routine use 5. from the Prefatory Statement of General Routine Uses available to all NRC systems of records to permit disclosures to a Congressional office in response to its inquiry made at the request of the subject individual.

A new routine use e. permitting disclosures to the National Archives and Records Administration and the General Services Administration for records management inspections conducted under 44 U.S.C. 2904 and 2906 is being added to the system.

A report on the proposed revisions to this system of records, required by 5 U.S.C. 552a(r) and the Office of Management and Budget (OMB) Circular No. A-130, is being sent to the Committee on Governmental Affairs, U.S. Senate; the Committee on Government Reform and Oversight, U.S. House of Representatives; and OMB.

Accordingly, the NRC proposes to amend NRC-3 in its entirety to read as follows:
