Date of Receipt: April 18, 1996. The extended comment period will close (insert date 15 days after date of publication in the Federal Register).

Applicant: Confidential.

Chemical: (G) Alkylated-nitrosated-Benzene.

Use: Pesticide Intermediate.

Production Volume: Confidential.

Number of Customers: Confidential.

Test Marketing Period: 12 months, commencing on first day of commercial manufacture.

Risk Assessment: EPA identified concerns for acute toxicity, methemoglobinemia, oncogenicity, developmental toxicity, and mutagenicity based on analogous chemical substances. However, during manufacturing, processing, and use, exposure to workers will be prevented by protective gloves, clothing, and goggles. Therefore, the test market activities will not present an unreasonable risk of injury to human health.

Although EPA expects the TME substance to be toxic to aquatic organisms, no releases of the TME substance to surface waters are expected because it will be completely consumed in the reaction process and any residuals will be recycled. Therefore, the test market activities will not present an unreasonable risk of injury to the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.
