## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-133, 50-275, AND 50-323]

### Diablo Canyon Power Plant, Units 1 and 2 and Humboldt Bay Power Plant Unit 3 Pacific Gas and Electric Company; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering approval under 10 CFR 50.80(a) of the transfer of control of the licenses that would be effected by the corporate restructuring of Pacific Gas and Electric Company (the licensee), holder of Facility Operating Licenses Nos. DPR-80, DPR-82, and DPR-7, issued for operation of the Diablo Canyon Nuclear Power Plant (DCPP), Units 1 and 2, located in San Luis Obispo County, California, and the Humboldt Bay Power Plant (HBPP), Unit 3, located in Humboldt County, California.

#### Environmental Assessment

##### *Identification of the Proposed Action*

The proposed action would consent to the transfer of control of the licenses that would result from the restructuring of Pacific Gas and Electric (PG&E) by establishment of a holding company under the temporary name "PG&E Parent Co., Inc." PG&E would become a wholly owned subsidiary and would continue to be the licensee of Diablo Canyon Nuclear Power Plant, Units 1 and 2, and Humboldt Bay Power Plant Unit 3. The proposed action is in accordance with PG&E's application dated November 1, 1995.

##### *The Need for the Proposed Action*

The proposed action is required to enable PG&E to restructure as described above. PG&E has submitted that restructuring will enable it to better prepare to implement changes resulting from electric industry restructuring, and will enhance the insulation of PG&E's California utility business, including the DCPP and HBPP units, from any business risks associated with non-utility enterprises.

##### *Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the proposed corporate restructuring and concludes that there will be no physical or operational changes to Diablo Canyon and Humboldt Bay. The corporate restructuring will not affect the qualifications or organizational affiliation of the personnel who operate

the facilities, as PG&E will continue to be responsible for the operation of the Diablo Canyon Nuclear Power Plant, Units 1 and 2 and Humboldt Bay Power Plant Unit 3.

The Commission has evaluated the environmental impact of the proposed action and has determined that the probability or consequences of accidents would not be increased by the restructuring, and that post-accident radiological releases would not be greater than previously determined. Further, the Commission has determined that the corporate restructuring would not affect routine radiological plant effluents and would not increase occupational radiological exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the restructuring would not affect nonradiological plant effluents and would have no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

##### *Alternative to the Proposed Action*

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternative with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are identical.

##### *Alternative Use of Resources*

This action does not involve the use of any resources not previously considered in the Final Environmental Statements for the Diablo Canyon Power Plant, dated May 1973, and the Humboldt Bay Power Plant, dated April 1987.

##### *Agencies and Persons Contacted*

In accordance with its stated policy, on May 17, 1996, the staff consulted with the California State official, Mr. Steve Hsu of the Radiologic Health Branch of the State Department of Health Services, regarding the environmental impact of the proposed action. The State official had no comments.

##### *Finding of No Significant Impact*

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated November 1, 1995, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms located at the Humboldt County Library, 1313 3rd Street, Eureka, California 95501, and at the California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Dated at Rockville, Maryland, this 11th day of June 1996.

For the Nuclear Regulatory Commission.  
Steven D. Bloom,

*Project Manager, Project Directorate IV-2, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.*

## Nuclear Safety Research Review Committee

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of change of meeting.

As previously announced, the Nuclear Safety Research Review Committee (NSRRC) will hold its next meeting on June 27-28, 1996. The purpose of the present notice is to provide a revised schedule, reflecting a change in meeting location and a change in the list of meeting topics. The location of the meeting will now be in Room T-10A1, Two White Flint North (TWFN) Building, 11545 Rockville Pike, Rockville, MD. The meeting will still be held from 9am to 5pm on both days.

The revised list of topics is as follows:

(1) To discuss the March 27, 1996 NSRRC briefing with the Commission;

(2) To receive a presentation by the Nuclear Energy Institute on their views on nuclear safety research needs; and

(3) To review and discuss the reports and recommendations of the Subcommittees on Research in Support of Risk-Based Regulation (PRA), including discussions on risk informed performance-based regulation; Instrumentation and Control (I&C) and
