SUPPLEMENTARY INFORMATION:

I. Background

In order to fulfill its responsibilities under the Federal Energy Administration Act of 1974 (Pub. L. No. 93-275) and the Department of Energy Organization Act (Pub. L. No. 95-91), the Energy Information Administration is obliged to carry out a central,

comprehensive, and unified energy data and information program. As part of this program, EIA collects, evaluates, assembles, analyzes, and disseminates data and information related to energy resource reserves, production, demand, and technology, and related economic and statistical information relevant to the adequacy of energy resources to meet demands in the near and longer term future for the Nation's economic and social needs.

The Energy Information Administration, as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13)), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing requirements. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection or recordkeeping requirements on respondents can be properly assessed.

The recordkeeping requirements are authorized by section 203(a)(1) of the Economic Stabilization Act (ESA) of 1970, as amended (Pub. L. 92-210, 85 Stat. 743) and by section 13(g) of the Federal Energy Administration Act (FEAA) of 1974, as amended (Pub. L. 93-275).

The Economic Regulatory Administration (ERA) proposes to extend for three years the limited recordkeeping requirements presently contained in 10 CFR 210.1. The antecedent regulation was narrowed by amendment in January 1985.

The record retention requirements of 10 CFR 210.1 do not mandate the creation or retention of any new records. Instead, they require firms to preserve only historical records relating to
