million tons of recoverable high-volatile  
B bituminous coal. The range of coal  
quality in the seams on an as received  
basis is as follows: 12,685-12,805 BTU/  
lb., 3.23-4.23 percent moisture, .34-.44  
percent sulfur, 5.36-6.9 percent ash,

public is invited to the hearing to make  
public or written comments on the EA

Willow Creek Tract, and also to submit  
comments on the fair market value

recovery (MER) of the tract.

**SUPPLEMENTARY INFORMATION:** In  
accordance with Federal coal  
management regulations 43 CFR 4322  
and 4325, a public hearing shall be held

on the proposed sale to allow public  
comment on and discussion of the  
potential effects of mining and proposed  
lease. Not less than 30 days prior to the  
publication of the notice of sale, the  
Secretary shall solicit public comments  
on fair market value appraisal and  
maximum economic recovery and on  
factors that may affect these two  
determinations. Proprietary data marked  
as confidential may be submitted to the  
Bureau of Land Management in  
response to this solicitation of public  
comments. Data so marked shall be  
treated in accordance with the laws and  
regulations governing the  
confidentiality of such information. A  
copy of the comments submitted by the  
public on fair market value and  
maximum economic recovery, except  
those portions identified as proprietary  
by the author and meeting exemptions  
stated in the Freedom of Information  
Act, will be available for public  
inspection at the Bureau of Land  
Management, Utah State Office during  
regular business hours (8:00 a.m. to 4:00  
p.m.) Monday through Friday.  
Comments on fair market value and  
maximum economic recovery should be  
sent to the Bureau of Land Management  
and should address, but not necessarily  
be limited to, the following information:

1. The quality and quantity of the coal  
resource.

2. The mining method or methods  
which would achieve maximum  
economic recovery of the coal,  
including specifications of seams to be  
mined and the most desirable timing  
and rate of production.

3. The quantity of coal.

4. If this tract is likely to be mined as  
part of an existing mine and therefore be  
evaluated on a realistic incremental  
basis, in relation to the existing mine to  
which it has the greatest value.

5. If this tract should be evaluated as  
part of a potential larger mining unit  
and evaluated as a portion of a new  
potential mine (i.e., a tract which does  
not in itself form a logical mining unit).

6. The configuration of any larger  
mining unit of which the tract may be  
a part.

7. Restrictions to mining which may  
affect coal recovery.

8. The price that the mined coal  
would bring when sold.

9. Costs, including mining and  
reclamation, of producing the coal and  
the time of production.

10. The percentage rate at which  
anticipated income streams should be  
discounted, either in the absence of  
inflation or with inflation, in which case  
the anticipated rate of inflation should  
be given.

11. Depreciation and other tax accounting factors.

12. The value of any surface estate where held privately.

13. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area.

14. Any comparable sales data of similar coal lands.

Coal quantities and the FMV of the coal developed by BLM may or may not change as a result of comments received from the public and changes in market conditions between now and when final economic evaluations are completed.

**DATES:** The public hearing will be held at the BLM Price Office Conference Room, 125 South 600 West, Price Utah, at 7:00 p.m. on July 30, 1996. Comments on fair market value and maximum economic recovery must be received at the Bureau of Land Management, Utah State Office, by August 15, 1996.
