ENVIRONMENTAL PROTECTION AGENCY

[FRL 5551-2; (ICR # 1520.01 and OMB # 2070-0110)]

Agency Information Collection Activities Up for Renewal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) for Recall of Suspended and Canceled Pesticides is coming up for renewal. Before submitting the renewal package to the Office of Management and Budget (OMB), EPA is soliciting comments on specific aspects of the collection as described below.

DATES: Comments must be submitted by October 11, 1996.

ADDRESSES: Office of Enforcement and Compliance Assurance, Office of Compliance, Agriculture and Ecosystems Division, Agriculture Branch (2225A), 401 M St., SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Phyllis Flaherty, Chief, Agriculture Branch, at 202-564-4131/fax: 202-564-0085 or David Stangel at 202-564-4162/fax: 202-564-0085.

SUPPLEMENTARY INFORMATION:

Affected Entities: This action affects registrants of suspended and canceled pesticides that are required to be recalled.

Title: Recall of Suspended and Canceled Pesticides (EPA Form No. 1520.01), OMB No. 2070-0110, Expiration Date: 9/30/96.

Abstract: Section 19(b) of the Federal Insecticide Fungicide and Rodenticide Act (FIFRA) authorizes the Administrator to order the recall of suspended and canceled pesticides by the registrant of the pesticide and others in the chain of distribution of the pesticide. The information reported to the Agency will be used to ensure that the recalled pesticides were transported, handled and stored safely, for indemnification purposes, and to plan for Agency reimbursement for storage of the recalled pesticides.

Pesticides subject to suspension and cancellation actions have been found to cause unreasonable adverse effects. The Agency has a special interest mitigating the hazards posed by stocks of the pesticide, including requiring that they be removed from the channels of distribution and use by means of a recall. The Agency is also concerned that the recalled pesticide be transported, handled and stored safely pending final disposition of the recalled stocks. Finally, the Agency is concerned that the recalled pesticides undergo proper treatment, recovery, or disposal.

As part of the suspension and cancellation order, registrants of the pesticide in question will be requested to recall the suspended and canceled pesticide from the channels of distribution and, if necessary, from the users of the pesticide. As part of the recall, registrants will be requested to submit a report to the Administrator which indicates who was contacted in carrying out the recall, the quantity of suspended and canceled pesticide in their possession and where the recalled pesticide is being stored.

EPA will not require respondents to fill out specific forms. However, EPA will establish a format into which respondents should organize the required data. The specific data that will be requested are: (1) A plan for contacting holders of the suspended and canceled pesticide; (2) how the suspended and canceled pesticide will be transported to a storage facility; (3) the name and location of the storage facility chosen and the criteria used for choosing the facility; and (4) the quantity of suspended and canceled pesticide by EPA Registration Number, number of containers, container size

(pounds or gallons as appropriate), total quantity (pounds or gallons as appropriate), for each discrete pesticide. Items 1, 2 and 3 would be provided prior to the recall taking place. Respondents will be requested to submit the information to the EPA Regional office having jurisdiction over the company headquarters.

Information that respondents are requested to collect and submit to the Agency will be used for a variety of purposes. The information will give the Agency an estimate of the amount of recalled pesticide being stored and allow the Agency to plan for reimbursement of storage costs. The Agency will also be better able to allocate resources for payment of indemnification claims to users of the suspended and canceled pesticide for losses suffered as a result of the suspension and cancellation as authorized by section 15 of FIFRA. Finally, the Agency will use the information for compliance purposes, determining where recalled pesticides are being stored, the quantity being stored at each location and the adequacy of the storage facility as determined through inspections. The information collected will enable the Agency to target inspections efficiently. The information collected will be used by EPA Regional and State pesticide compliance and enforcement staffs, the Office of Enforcement and Compliance Assurance and the Office of Pesticide Programs.

The EPA would like to solicit comments to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement

Burden Hours per Response: 40 hours per respondent which includes time for reading the Federal Register or Notice of Intent to Cancel, plan activities, create and gather information, process information, and record and report information.

Frequency of Response: As necessary. Burden estimates are based on one recall action per year.

² A more extensive discussion of the significance of the OMB control number can be found in 75 FERC ¶ 61,106 (1996).

Number of Respondents: 40 respondents per recall action.

Total Annual Reporting and Recordkeeping Burden: 1,600 hours.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control number for EPA's regulations are displayed in 40 CFR Part 9.

Send comments regarding these matters, or any other aspect of the information collection, including suggestions for reducing the burden, to the address listed above.

Dated: August 5, 1996.

Elaine E. Stanley,

Director, Office of Compliance, Office of Enforcement and Compliance Assurance.

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Requirements for Generators, Transporters, and Waste Management Facilities Under the RCRA Hazardous Waste Manifest System

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C.3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Requirements for Generators, Transporters, and Waste Management Facilities Under the RCRA Hazardous Waste Manifest System, ICR No. 801.11, OMB No. 2050-0039. The

ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before September 11, 1996.

FOR FURTHER INFORMATION OR A COPY

CALL: Sandy Farmer at EPA, (202) 260-2740, and refer to EPA ICR No. 801.11, OMB Control No. 2050-0039.

SUPPLEMENTARY INFORMATION

Title: Requirements for Generators, Transporters, and Waste Management Facilities Under the RCRA Hazardous Waste Manifest System, ICR No. 801.11, OMB No.2050-0039. This request is an extension of a currently approved collection.

Abstract: EPA's authority to require compliance with the manifest system stems primarily from RCRA § 3002(a)(5). This section mandates a hazardous waste manifest system to assure that all hazardous waste generated is designated for and arrives at the appropriate treatment, storage, disposal facility. An essential part of the manifest system is the Uniform Hazardous Waste Manifest (Form 8700-22A). The manifest is a tracking document that accompanies the waste from its generation site to its final disposition. The manifest lists the wastes that are being shipped and the final destination of the waste.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 1, 1996 (61 FR 14303); 8 comments were received.

Burden Statement: The reporting burden per response for this collection of information is estimated to average 25 minutes for generators, 10 minutes for transporters, and 10 minutes for treatment, storage and disposal facilities. The record keeping burden per response for this collection of information is estimated to average 6 minutes for generators, 6 minutes for transporters, and 6 minutes for treatment, storage and disposal facilities.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop,

acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Estimated Number of Respondents: 214,395 generators, 500 transporters, 739 TSDFs, and 31 States having manifest programs which collect data from waste handlers.

Frequency of Response: Annual Frequency of Response per Waste Handler is 341 for generators, 5,241 for Transporters, and 3,059 for TSDFs.

Estimated Total Annual Hour Burden: 2,822,873 hours.

Estimated Total Annualized Cost Burden: \$1,292,772.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 801.11 and OMB Control No. 2050-0039 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460.

and
Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: August 5, 1996.

Joseph Retzer,

Director, Regulatory Information Division.
