

of waste has begun, the WIPP LWA requires the DOE to submit a remedial plan to EPA.

This guidance describes the application of Subpart A to activities associated with the 25- to 30-year period during which packaged waste would arrive at the above ground portion of the WIPP, be unloaded and prepared for emplacement in the underground repository, and ultimately lowered down a mechanical hoist and emplaced in the mined-out repository, if the WIPP is approved for use as a disposal system. During this period, the annual doses from radiation received by members of the general public must not exceed the limits specified by Subpart A. The WIPP Subpart A Guidance interprets Subpart A for the WIPP and provides the Agency's recommendations for methods used to demonstrate and document compliance with the standards. The guidance also describes information DOE should report to EPA for the Agency's evaluation of the WIPP's compliance with the Subpart A dose limits.

By today's action, the EPA is inviting the public to comment on the WIPP Subpart A Guidance, available in draft at the addresses identified above, by submitting written comments for EPA's consideration. EPA requests comments on all aspects of the draft guidance for the implementation of 40 CFR Part 191, Subpart A for the WIPP.

The draft WIPP Subpart A Guidance will be revised and made available to the public. Revised guidance is expected to be made available in fall 1996. The draft guidance interprets 40 CFR Part 191, Subpart A. The guidance does not establish a new standard and does not establish binding rights or duties, but will be a non-binding guide for EPA's evaluation of the WIPP's compliance with Subpart A. Because it is a non-binding, interpretive document, the WIPP Subpart A Guidance is not subject to the notice-and-comment rulemaking requirements of the Administrative Procedures Act, 5 U.S.C. 553. Thus, EPA does not plan to provide written responses to the public comments submitted. Nevertheless, EPA will fully consider public comments in developing the WIPP Subpart A Guidance.

Dated: August 28, 1996.

Richard Wilson,

Acting Assistant Administrator, Office of Air and Radiation.
