

addressed quality of life and other concerns.

The Basis for the Decision

After carefully evaluating public comments throughout the planning process, including comments on the Draft and Final GMP/EIS, the selected action best accomplishes the monument's legislated purpose to provide a center for continuing paleontological research and education. It balances the statutory mission of the National Park Service to provide long-term protection of monument resources and significance while allowing for appropriate levels of visitor use and appropriate means of visitor enjoyment. The selected action also best accomplishes identified management goals and desired future conditions, with the fewest environmental impacts.

Support for the selected action and monument purpose has been generally widespread and strong, as described in the Final GMP/EIS. No comments or protests were received on the final plan and environmental impact statement during the 30-day no-action period that the document was available to the public.

Conclusion: The above factors and considerations warrant selecting Alternative 2, identified as the proposed action in the draft document (and as modified in the Final GMP/EIS), as the general management plan for Hagerman Fossil Beds National Monument. The selected action will be implemented as described, and a final document including only the selected action will be printed and made available to aid in implementing the plan.

Dated: September 23, 1996.
