The Office of Management and Budget is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

Title: Hazard Communication.

OMB Number: 1218-0072.

Frequency: On occasion.

Affected Public: Business or other for-profit, Federal government and State, Local or Tribal governments.

Number of Respondents: 5,041,918.

Estimated Time per Respondent: Time per response ranges from 12 seconds to affix labels to containers containing hazardous chemicals to 5 hours to develop a hazard communication program.

Total Burden Hours: 13,201,863.

Total Burden Cost (capital/startup): 0.

Total Burden Cost (operating/maintaining): 0.

Description: The Hazard Communication Standard and its information collection requirements are designed to ensure that the hazards of all chemicals produced or imported are evaluated and that information concerning their hazards is transmitted to employees and downstream employers. The standard requires chemical manufacturers and importers to evaluate chemicals they produce or import to determine if they are hazardous; for those chemicals determined to be hazardous, material safety data sheets and warning labels must be developed. Employers are required to establish hazard communication programs, to transmit information on the hazards of chemicals to their employees by means of labels on containers, material safety data sheets and training programs. Implementation of these collection of information requirements will ensure all employees have the "right-to-know" the hazards and identities of the chemicals they work with and will reduce the incidence of chemically-related occupational illnesses and injuries.
