Rural Utilities Service

Notice of Request for Extension of a Currently Approved Information Collection

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended), this notice announces the Rural Utilities Service's (RUS) intentions to request an extension to a currently approved information collection.

DATES: Comments on this notice must be received by April 15, 1996.

FOR FURTHER INFORMATION CONTACT: Dawn D. Wolfgang, Management Analyst, Program Support Staff, Rural Utilities Service, U.S. Department of Agriculture, 14th & Independence Ave., SW., AG Box 1522, Washington, DC 20250-1522. Telephone: (202) 720-0812. FAX: (202) 720-4120.

SUPPLEMENTAL INFORMATION:

Title: Inventory of Work Orders.

OMB Control Number: 0572-0019.

Type of Request: Extension of a currently approved information collection.

Abstract: When a prospective borrower requests and is granted an RUS loan, a loan contract is established between the Federal government, acting through the RUS Administrator, and the borrower. At the time this contract is entered into, the borrower must provide

RUS with a list of projects for which loan funds will be spent, along with an itemized list of the estimated costs of these projects. Thus, the borrower receives loan funds based upon estimated cost figures. If, during or after completion of the project(s), the actual costs prove to be different from the estimated costs, the borrower must reconcile the discrepancies with RUS.

RUS Form 219, Inventory of Work Order, allows the borrower to adjust those estimated expenditures to reflect actual expenditures. The form serves as a connecting link and provides an audit trail that originates with the advance of funds and terminates with evidence supporting the propriety of expenditures for construction or retirement projects.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.5 hours per response.

Respondents: Small business or organizations.

Estimated Number of Respondents: 900.

Estimated Number of Responses per Respondent: 9.

Estimated Total Annual Burden on Respondents: 12,150.

Copies of this information collection, and related form and instructions, can be obtained from Dawn Wolfgang, Program Support Staff, at (202) 720-0812.

Comments are invited on: (a) Whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments may be sent to: F. Lamont Heppe, Jr., Deputy Director, Program Support Staff, Rural Utilities Service, U.S. Department of Agriculture, 14th & Independence Ave., SW., AG Box 1522, Washington, DC 20250-1522. FAX: (202) 720-4120.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: February 8, 1996.
 Wally Beyer,
Administrator, Rural Utilities Service.

SUPPLEMENTARY INFORMATION: In
September 1994, the Access Board
established an advisory committee to
review the Americans with Disabilities
Act Accessibility Guidelines (ADAAG)
for buildings and facilities. 36 CFR part
1191, appendix A. The Advisory
Committee will make recommendations
to the Access Board for updating
ADAAG to ensure that the guidelines
remain a state-of-the-art document
which is generally consistent with
technological developments and
changes in national standards and
model codes, and continue to meet the
needs of individuals with disabilities.
The advisory committee is composed of
organizations representing individuals

SUPPLEMENTARY INFORMATION:

I. Abstract

The 1996 Test Census is designed to
test new and improved methodologies
for reducing the differential in the
census results among the various
components of the population, and for
containing costs associated with
conducting a census. The Census
Bureau will use the results of this test,
in combination with other research, to
decide how to conduct the 2000 census.
The test will be conducted in two rural
sites and one urban site with a
combined housing unit total of about
10,000. The rural sites (roughly 2,000
housing units) will encompass two
American Indian reservations. The
urban site (roughly 8,000 housing units)
will encompass six census tracts in
Chicago, Illinois.

A primary objective for both the rural
and urban components of the test is to
refine the Integrated Coverage
Measurement (ICM) program. Other
objectives are listed below.

Major objectives for the rural
component of the test:

- Use and evaluate tribal
"administrative records," such as tribal
rolls, utility records, tribal school
records, and tribal voter registration as
coverage improvement tools.
- Use improved address list
development and collection
methodology.
- Implement and evaluate a
"partnership agreement" with the tribes,
and expand the Tribal Liaison's role to
include involvement in census
operational activities.

- Test the use of statistical estimation
techniques to improve the enumeration
of residents on American Indian
reservations and trust lands.

Major objectives for the urban
component of the test:

- Test the ICM program in a
reengineered census setting.
- Test techniques for measuring
housing unit and noninstitutional group
quarters coverage in a census setting.
- Test use of administrative records
for coverage improvement.
- Test improved address listing
techniques.

The 1996 Test Census will include
four questionnaires—two self-
