

raised safety concerns to NU or the NRC. As explained in the letter, the NRC conducted investigations into some of the harassment and intimidation allegations that the Petitioner had raised. The NRC did not substantiate that the Petitioner suffered discrimination for raising safety concerns. Further, of the complaints of harassment and intimidation that the Petitioner raised that were investigated by the DOL, none have been substantiated.

The staff has, in addition, reviewed the Petitioner's remaining allegations of harassment and intimidation, including those in the Petition, and has concluded that they do not present sufficient information warranting further investigatory effort. Accordingly, absent a finding of discrimination by the Secretary of Labor or an Administrative Law Judge on any pending complaints, or significant new evidence from the Petitioner that would support the allegations that NU has harassed, intimidated, or discriminated against him, the NRC staff plans no further followup of the harassment and intimidation complaints. Based on the above, no further action is warranted.

### III. Conclusion

The licensee evaluated the technical issues and provided the results to the staff for review. The staff also conducted inspections to independently determine if the licensee's conclusions and corrective actions were acceptable. As explained above, none of the technical issues reflect a lack of procedural compliance or warrant additional action by the staff. Also, as explained above, the Petitioner's assertion of harassment and intimidation does not warrant any action.

On the basis of the above assessment, I have concluded that no issues have been raised regarding Millstone Unit 1 that would require initiation of enforcement action. Therefore, no enforcement action is being taken in this matter.

The Petitioner's request for action pursuant to 10 CFR 2.206 is denied. As provided in 10 CFR 2.206(c), a copy of this Decision will be filed with the Secretary of the Commission for the Commission's review. This Decision will constitute the final action of the Commission 25 days after issuance unless the Commission, on its own motion, institutes review of the Decision in that time.

Dated at Rockville, Maryland, this 31st day of October 1996.

### Notice of Issuance and Availability of NUREG-1567 Standard Review Plan for Spent Fuel Dry Storage Facilities

The United States Nuclear Regulatory Commission has issued a draft report NUREG-1567 entitled "Standard Review Plan for Spent Fuel Dry Storage Facilities," for review and comment.

The Standard Review Plan for Spent Fuel Dry Storage Facilities (FSRP) is prepared for the guidance of staff reviewers in the Spent Fuel Project Office in performing safety reviews of license applications for installations for dry storage of nuclear materials under Title 10 Code of Federal Regulations, Chapter 1, Part 72 (10 CFR 72). The principal purpose of the FSRP is to assure the quality and uniformity of staff safety reviews. It is also the intent of this plan to make information about regulatory matters widely available and to improve communications between the NRC, interested members of the public, and the nuclear power industry, thereby increasing understanding of the review process. The FSRP also defines a basis for evaluating modifications of the review process in the future.

Draft NUREG-1567 is available for inspection and copying for a fee at the NRC Public Document Room, 2120 L Street NW (Lower Level), Washington, D.C. 20555-0001. A free copy of Draft NUREG-1567 may be requested by writing to Distribution Services, Printing and Mail Services Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001.

Comments on all aspects of this draft document are welcome and will be considered and incorporated into the FSRP, as appropriate. Furthermore, since the staff is considering alternatives to the seismic requirements in § 72.102, for ISFSIs, comments are particularly invited on Sections 2.4.6 and 2.5.6. It is requested that comments be submitted using the form (or a photocopy thereof) contained in Appendix E. Comments on draft NUREG-1567 should be submitted by March 1, 1997. The FSRP is scheduled for publication as an NRC NUREG document in 1997.

A separate Standard Review Plan for Dry Cask Storage Systems (DCSRP) was issued for public comment in February 1996 as draft NUREG 1536. The DCSR is scheduled to be published as an NRC

NUREG document in January 1997. To ensure consistency between the two standard review plans (SRPs), comments on sections common to both SRPs will be considered and incorporated, as appropriate, in both NUREGs.

Mail comments to: Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publication Services, Mail Stop T-6 D59, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001. Comments may be hand-delivered to 11545 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m., on Federal workdays.

Comments may also be submitted electronically, in either ASCII text or WordPerfect format (version 5.1 or later) containing information requested in Appendix E, by calling the NRC Electronic Bulletin Board on FEDWORLD. The bulletin board may be accessed using a personal computer, a modem, and one of the commonly available communications software packages, or directly via Internet.

If using a personal computer and modem, the NRC subsystem on FEDWORLD can be accessed directly by dialing the toll-free number: 1-800-303-9672. Communication software parameters should be set as follows: parity to none, data bits to 8, and stop bits to 1 (N,8,1). Using ANSI terminal emulation, the NRC NUREG and Reg Guide Comments subsystem can then be accessed by selecting the "NRC Rules Menu" option from the "NRC Mail Menu." For further information about options available for NRC at FEDWORLD, consult the "Help/Information Center" from the "NRC Main Menu." Users will find the "FEDWORLD Online User's Guides" particularly helpful. Many NRC subsystems and databases also have a "Help/Information Center" option that is tailored to the particular subsystem.

The NRC subsystem on FEDWORLD can also be accessed by a direct dial phone number for the main FEDWORLD BBS: 703-321-3339; Telnet via Internet: fedworld.gov (192.239.92.3); File Transfer Protocol (FTP) via Internet: ftp.fedworld.gov (192.239.92.205); and World Web using: <http://www.fedworld.gov> (this is the Uniform Resource Locator (URL)).

If using a method other than the toll-free number to contact FEDWORLD, the NRC subsystem will be accessed from the main FEDWORLD menu by selecting the "Regulatory, Government Administration and State Systems," the selecting "Regulatory Information Mall." At that point, a menu will be displayed that has an option "U.S.

Nuclear Regulatory Commission" that will take you to the NRC Online main menu. The NRC Online area can also be accessed directly by typing "/go nrc" at a FEDWORLD command line. If you access NRC from FEDWORLD's main menu, you may return to FEDWORLD by selecting the "Return to FEDWORLD" option from the NRC Online Main Menu. However, if you access NRC at FEDWORLD by using NRC's toll-free number, you will have full access to all NRC systems but will not have access to the main FEDWORLD system.

If you contact FEDWORLD using Telnet, you will see the NRC area and menus, including the Rules menu. Although you will be able to download documents and leave messages, you will not be able to write comments or upload files (comments). If you contact FEDWORLD using FTP, all files can be accessed and downloaded but uploads are not allowed; all you will see is a list of files without descriptions (normal Gopher look). An index file listing all files within a subdirectory, with descriptions, is included. There is a 15-minute time limit for FTP access.

Although FEDWORLD can be accessed through the World Wide Web, like FTP that mode provides access for downloading files and does not display the NRC Rules Menu. For more information on NRC bulletin boards, call Mr. Arthur Davis, Systems
