

recreation plan and flow release plan required by articles 410 and 411 of the project license, respectively. The recreation plan includes provisions for a canoe portage around the project, and fishing and boating access to the reservoir and tailwater area. The flow release plan proposes the release of flows for whitewater recreational boating purposes below the New York State Route 3 bridge. In the recreation plan, the licensee is proposing to modify the canoe portage route considered during licensing, due to site constraints at the put-in location. Further, the licensee is proposing not to provide fishing access on the side of the river downstream of the powerhouse, given that fishing access will be provided across the river at Water Works Park.
