Utah: Release of Coal Exploration License Data, UTU-48608

ACTION: Notice of preliminary determination to allow public access to data from coal exploration license UTU-48608.

SUMMARY: BLM regulations at 43 CFR 2.22 and 3410.4(b) provide that data obtained under an exploration license will be kept confidential until the lands have been leased or BLM determines that public access to the data would not damage the competitive position of the licensee, whichever comes first. Coal Exploration License UTU-48068 was issued to Royal Land Company on August 4, 1981. Exploration under this license included drilling 15 holes in the vicinity of North Horn Mountain, Emery County, Utah. The lands covered by this license were offered for lease on May 29, 1982, and no bids were received. Based on the lack of interest in the unleased Federal coal covered by this license since the drilling was completed and the fact that no bids were received when the lands were offered for lease in 1982, BLM has determined that it is in the public interest to release the data obtained under Exploration License UTU-48608. BLM has further made a preliminary finding that the competitive interest of the licensee or any participants would not be harmed by the release of this data. The licensee, any participants, or any successor thereto, objecting to this determination, must respond by January 24, 1997, to document any assertion that public release of these data would damage any present competitive position they hold. Such documentation must include:

1. A statement describing the data to whose disclosure you object.

2. A copy of any participation agreement or other evidence verifying your participation in UTU-48606 and any interest you may have in the data.

3. A demonstration of the specific competitive harm that disclosure of the data would cause to your competitive position.

DATES: Objections, if any, to be filed by January 24, 1997.

Publication of this notice will not initiate an additional comment period. The Bureau of Land Management may accept or reject any or all offers, or withdraw any land or interest in the land from sale, if, in the opinion of the authorized officer, consummation of the sale would not be fully consistent with FLPMA, or other applicable laws.

Notice of Intent To Amend the Medicine Lodge Resource Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to amend the Medicine Lodge Resource Management Plan, and to prepare an environmental assessment for this amendment.

SUMMARY: The BLM has received a request from the Fremont and Jefferson County Commissioners to amend their Rights-of-Way (IDI-22460, IDI-22461) on the Elgin-Hamer Road. The amendments would amend the seasonal closure from December 1 through March 31, and allow the road to remain open with other mitigation measures to protect wintering elk. Amendment to the Rights-of-Way require an amendment to the Medicine Lodge Resource Management Plan (RMP) to amend the seasonal limitations. An environmental assessment will be prepared to analyze these amendments. **DATES:** Comments on the proposed amendments and issues or concerns to be addressed in the environmental assessment will be accepted through January 31, 1997.

FOR FURTHER INFORMATION CONTACT: Jeff Gardetto, Bureau of Land Management, 1405 Hollipark Drive, Idaho Falls, ID 83401. (208) 524-7545.

SUPPLEMENTARY INFORMATION: In 1988, Rights-of-Way were issued to Fremont County (IDI-22460) and Jefferson County (IDI-22461) for use along the Egin-Hamer road. The ten mile gravel road connects the communities of Egin and Hammer in southeastern Idaho (T7N., R. 38E., Boise Meridian). In 1983 concerns about effects of vehicle travel on wintering elk populations prompted an amendment to the Medicine Lodge Resource Management Plan (completed in 1988) closing the area to vehicle use from December 1 through March 31 of each year. This seasonal closure was incorporated as stipulations to the Rights-of-Way issued to the counties. Monitoring studies of the elk population have indicated that elk do not use the area to the extent or at the times addressed in the original environmental analysis of the grants (Egin-Hamer Plan Amendment and Final Environmental Impact Statement, 1987).
