Overview of this information collection:

1. *Type of Information Collection:* New Collection.

2. *Title of the Form/Collection:* Collection of analyzed drug data from non-Federal forensic crime laboratories.

3. *Agency form number:* None; *Applicable component of the Department of Justice sponsoring the collection:* Office of Diversion Control, Drug Enforcement Administration, Department of Justice.

4. *Affected public who will be asked to respond, as well as a brief abstract:* *Primary:* State and local crime laboratories. *Other:* None.

DEA is required under the Controlled Substances Act (CSA) [21 U.S.C. 811 (b)] to gather data relevant to a determination of the actual or relative abuse potential of drugs. Existing Federal drug abuse data bases do not provide the type or quality of information necessary to accomplish this task in a timely and efficient manner. Non-Federal crime laboratories conduct chemical analyses on a

significantly larger number of illicit drug samples than DEA's seven laboratories. The non-Federal analyzed drug data is an untapped resource which would give DEA a very comprehensive representation of drug trafficking in the U.S. This data has the highest degree of validity because it is verified by chemical analysis. DEA is coordination this voluntary, cooperative program to provide a centralized source of analyzed laboratory drug data. Participating laboratories and other government agencies will be permitted to access part of the data base.

5. An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: 330 respondents at 12 times per year at 8 hours per response.

6. An estimate of the total public burden (in hours) associated with the collection: 31,680 annual burden hours.

Public comment on this proposed information collection is strongly encouraged.

Dated: March 11, 1997.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.
