

impact on plant effluents and will not result in any impact to the environment.

2. The proposed amendment will not result in a significant increase in individual or cumulative occupational radiation exposure.

The proposed amendment will not increase exposure.

3. The proposed amendment will not result in a significant construction impact.

The proposed amendment will not result in any construction, therefore, there will be no construction impacts.

4. The proposed amendment will not result in a significant increase in the potential for, or radiological or chemical consequences from, previously analyzed accidents.

The proposed amendment to include a definition for completion time and to define the maximum time interval for repetitive actions will provide more formality for the conduct of plant operations. This inclusion will ensure consistent interpretation of the requirements. The proposed changes do not affect the potential for or radiological or chemical consequences from previously evaluated accidents.

5. The proposed amendment will not result in the possibility of a new or different kind of accident.

The proposed amendment to include a definition for completion time and to define the maximum time interval for repetitive actions will ensure consistent interpretation of the requirements. The changes will not create new operating conditions or a new plant configuration that could lead to a new or different type of accident.

6. The proposed amendment will not result in a significant reduction in any margin of safety.

A definition for completion time and the definition for a maximum time interval for repetitive actions were not formally defined in the past and were subject to interpretation. The addition of these definitions for completion time and the maximum time interval for repetitive actions provides more formality for the conduct of plant operations. The proposed changes cause no reductions in the margins of safety.

7. The proposed amendment will not result in an overall decrease in the effectiveness of the plant's safety, safeguards or security programs.

The proposed amendment to include a definition for completion time and to define the maximum time interval for repetitive actions provides more formality for the conduct of plant operations. The effectiveness of the safety, safeguards, and security programs is not decreased.

Effective date: 30 days after issuance

Certificate of Compliance No. GDP-1: Amendment will incorporate a new Technical Safety Requirement, a revised Technical Safety Requirement and Safety Analysis Report changes.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Commonwealth of Massachusetts: Discontinuance of Certain Commission Regulatory Authority Within the Commonwealth

AGENCY: Nuclear Regulatory
Commission.

ACTION: Notice of agreement with the
Commonwealth of Massachusetts.

SUMMARY: Notice is hereby given that Shirley Ann Jackson, Chairman of the U.S. Nuclear Regulatory Commission (NRC) and William F. Weld, Governor of the Commonwealth of Massachusetts, have signed the Agreement set forth below for the discontinuance by the Commission and assumption by the Commonwealth of certain Commission regulatory authority. The Agreement is published pursuant to Section 274 of the Atomic Energy Act of 1954, as amended. Under the Agreement, certain persons would be exempted from certain of the regulatory requirements of the Commission. The pertinent exemptions have been previously published in the **Federal Register** and are codified in the Commission's regulations as 10 CFR part 150.

FOR FURTHER INFORMATION CONTACT:
Richard L. Blanton, Office of State
Programs, U.S. Nuclear Regulatory
Commission, Washington, DC 20555-
0001. Telephone (301) 415-2322 or e-
mail RLB@NRC.GOV.

The draft of the Agreement was published in the **Federal Register** for comment on four separate dates (see, e.g. 61 FR 68066, December 26, 1996). One comment was received which requested that NRC retain jurisdiction over a site listed on the Site Decommissioning Management Plan (SDMP) until the NRC license for the site is terminated. NRC expedited the actions necessary to terminate the

subject SDMP site license and on March 21, 1997, NRC terminated the license and removed the site from the SDMP list.

Appendix—Text of the Agreement

Agreement Between the United States Nuclear Regulatory Commission and the Commonwealth of Massachusetts for the Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the Commonwealth Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended

Whereas, The United States Nuclear Regulatory Commission (hereinafter referred to as the Commission) is authorized under Section 274 of the Atomic Energy Act of 1954, as amended (hereinafter referred to as the Act), to enter into agreements with the Governor of any State providing for discontinuance of the regulatory authority of the Commission within the State under Chapters 6, 7, and 8, and Section 161 of the Act with respect to by-product materials as defined in Sections 11e.(1) and (2) of the Act, source materials, and special nuclear materials in quantities not sufficient to form a critical mass; and,

Whereas, The Governor of the Commonwealth of Massachusetts is authorized under Massachusetts General Laws, Chapter 111H, to enter into this Agreement with the Commission; and,

Whereas, The Governor of the Commonwealth of Massachusetts certified on March 28, 1996, that the Commonwealth of Massachusetts (hereinafter referred to as the Commonwealth) has a program for the control of radiation hazards adequate to protect public health and safety with respect to the materials within the Commonwealth covered by this Agreement, and that the Commonwealth desires to assume regulatory responsibility for such materials; and,

Whereas, The Commission found on March 3, 1997, that the program of the Commonwealth for the regulation of the materials covered by this Agreement is compatible with the Commission's program for the regulation of such materials and is adequate to protect public health and safety; and,

Whereas, The Commonwealth and the Commission recognize the desirability and importance of cooperation between the Commission and the Commonwealth in the formulation of standards for protection against hazards of radiation and in assuring that Commonwealth and Commission programs for protection against hazards

of radiation will be coordinated and compatible; and,

Whereas, The Commission and the Commonwealth recognize the desirability of reciprocal recognition of licenses and exemptions from licensing of those materials subject to this Agreement; and,

Whereas, This Agreement is entered into pursuant to the provisions of the Atomic Energy Act of 1954, as amended;

Now, Therefore, It is hereby agreed between the Commission and the Governor of the Commonwealth, acting in behalf of the Commonwealth, as follows:

Article I

Subject to the exceptions provided in Articles II, IV, and V, the Commission shall discontinue, as of the effective date of this Agreement, the regulatory authority of the Commission in the Commonwealth under Chapters 6, 7, and 8, and Section 161 of the Act with respect to the following materials:

A. By-product materials as defined in Section 11e.(1) of the Act;

B. Source materials;

C. Special nuclear materials in quantities not sufficient to form a critical mass; and,

D. Licensing of Low-Level Radioactive Waste Facilities.

Article II

This Agreement does not provide for discontinuance of any authority and the Commission shall retain authority and responsibility with respect to regulation of:

A. The construction and operation of any production or utilization facility;

B. The export from or import into the United States of by-product, source, or special nuclear material, or of any production or utilization facility;

C. The disposal into the ocean or sea of by-product, source, or special nuclear waste materials as defined in regulations or orders of the Commission;

D. The disposal of such other by-product, source, or special nuclear material as the Commission from time to time determines by regulation or order should, because of the hazards or potential hazards thereof, not be so disposed of without a license from the Commission; and,

E. The extraction or concentration of source material from source material ore and the management and disposal of the resulting by-product material.

Article III

This Agreement may be amended, upon application by the Commonwealth and approval by the Commission, to include the additional area(s) specified

in Article II, paragraph E, whereby the Commonwealth can exert regulatory control over the materials stated therein.

Article IV

Notwithstanding this Agreement, the Commission may from time to time by rule, regulation, or order, require that the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source, by-product, or special nuclear material shall not transfer possession or control of such product except pursuant to a license or an exemption from licensing issued by the Commission.

Article V

This Agreement shall not affect the authority of the Commission under Subsection 161b or 161i of the Act to issue rules, regulations, or orders to protect the common defense and security, to protect restricted data or to guard against the loss or diversion of special nuclear material.

Article VI

The Commission will use its best efforts to cooperate with the Commonwealth and other Agreement States in the formulation of standards and regulatory programs of the Commonwealth and the Commission for protection against hazards of radiation and to assure that Commonwealth and Commission programs for protection against hazards of radiation will be coordinated and compatible. The Commonwealth will use its best efforts to cooperate with the Commission and other Agreement States in the formulation of standards and regulatory programs of the Commonwealth and the Commission for protection against hazards of radiation and to assure that the Commonwealth's program will continue to be compatible with the program of the Commission for the regulation of like materials. The Commonwealth and the Commission will use their best efforts to keep each other informed of proposed changes in their respective rules and regulations and licensing, inspection and enforcement policies and criteria, and to obtain the comments and assistance of the other party thereon.

Article VII

The Commission and the Commonwealth agree that it is desirable to provide reciprocal recognition of licenses for the materials listed in Article I licensed by the other party or by any other Agreement State. Accordingly, the Commission and the State agree to use their best efforts to develop appropriate rules, regulations,

and procedures by which such reciprocity will be accorded.

Article VIII

The Commission, upon its own initiative after reasonable notice and opportunity for hearing to the Commonwealth, or upon request of the Governor of the Commonwealth, may terminate or suspend all or part of this Agreement and reassert the licensing and regulatory authority vested in it under the Act if the Commission finds that (1) such termination or suspension is required to protect public health and safety, or (2) the Commonwealth has not complied with one or more of the requirements of Section 274 of the Act. The Commission may also, pursuant to Section 274j of the Act, temporarily suspend all or part of this Agreement if, in the judgment of the Commission, an emergency situation exists requiring immediate action to protect public health and safety and the Commonwealth has failed to take necessary steps. The Commission shall periodically review this Agreement and actions taken by the Commonwealth under this Agreement to ensure compliance with Section 274 of the Act.

Article IX

This Agreement shall become effective on March 21, 1997, and shall remain in effect unless and until such time as it is terminated pursuant to Article VIII.
