

reauthorized Safe Drinking Water Act (SDWA), signed by President Clinton on August 6, 1996. The term "source water" denotes any ground or surface water supply source destined for use as public drinking water. The SWAP is required of all States with primacy responsibility for administering drinking water programs, and consists of delineating drinking water source protection areas and conducting contaminant source inventories and susceptibility analyses within those delineated areas. The SWPP is voluntary for States, and consists of developing incentive-based voluntary management measures to reduce or eliminate threats to drinking water sources within assessed drinking water source protection areas. The SDWA requires EPA to publish final guidance for both SWAPs and SWPPs by August 6, 1997. The draft guidance announced in this notice has been developed by EPA so that the public may have the opportunity to review and comment on its contents before final guidance is issued. EPA is seeking comment on all aspects of the guidance.

**DATES:** EPA will accept public comment on this guidance until Friday, June 13, 1997.

**ADDRESSES:** Copies of the Draft Guidance for State Source Water Assessment and Protection Programs including Petition Programs are available from the Safe Drinking Water Act Hotline, telephone (800) 426-4791.
