SUPPLEMENTARY INFORMATION:

Background

NMFS issued proposed regulations containing guidelines for the description and identification of EFH in fishery management plans, adverse impacts on EFH, and actions to conserve and enhance EFH on April 23, 1997 (62 FR 19723). The regulations would also provide a process for NMFS to coordinate and consult with Federal and state agencies on activities that may

adversely affect EFH. The guidelines are required by the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The purpose of the rule is to assist fishery management councils in fulfilling the requirements set out by the Magnuson-Stevens Act to amend their fishery management plans to describe and identify EFH, minimize adverse effects on EFH, and identify other actions to conserve and enhance EFH. The purpose of the coordination and consultation provisions is to specify procedures for adequate consultation with NMFS on activities that may adversely affect EFH.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Lee Crockett (see **ADDRESSES**) at least 5 days prior to the meeting date.
