

local law, and imposes no new requirements. Accordingly, no additional costs to state, local, or tribal governments, or the private sector, result from this action.

D. Petitions for Judicial Review

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 18, 1997. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference.

Dated: May 9, 1997.

Valdas V. Adamkus,
Regional Administrator.

For the reasons stated in the preamble, part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart O—Illinois

2. Section 52.720 is amended by adding paragraph (c)(134) to read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(134) On May 5, 1995, and May 26, 1995, the State of Illinois submitted a State Implementation Plan revision request to the United States Environmental Protection Agency for reactor processes and distillation operation processes in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material (VOM) emissions for the Chicago and Metro-East (East St. Louis) areas. VOM, as defined by the State of Illinois, is identical to "volatile organic compounds" (VOC), as defined by EPA. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control

Technology rules for sources that are covered by Control Techniques Guideline documents. The EPA approves the State Implementation Plan revision request as it applies to Stepan Company's Millsdale Facility.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 218.431 Applicability, 218.432 Control Requirements, 218.433 Performance and Testing Requirements, 218.434 Monitoring Requirements, 218.435 Recordkeeping and Reporting Requirements, 218.436 Compliance Date, 218 Appendix G, TRE Index Measurement for SOCMR Reactors and Distillation Units, amended at 19 Ill. Reg. 6848, effective May 9, 1995.

BILLING CODE 6560-50-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[I.D. 060397D]

Atlantic Tuna Fisheries; Recreational Fishery Adjustments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Fishery reopening.

SUMMARY: NMFS reopens the Angling category fishery for school, large school, and small medium Atlantic bluefin tuna (ABT) for all areas. The Angling category fishery for school, large school, and small medium ABT will open beginning June 13, 1997. The Angling category fishery for large school and small medium ABT will close on June 27, 1997 at 11:30 p.m. local time in the southern area (Delaware and states south) only. The northern Angling category fishery for large school and

small medium ABT, and the Angling category fishery for school ABT in all areas, will remain open until further notice. The daily catch limit for the reopening remains at one ABT per vessel. This action is being taken to extend scientific data collection on ABT and to further domestic management objectives for the Atlantic tuna fisheries, while preventing overharvest of the regional Angling category subquotas.

DATES: The Angling category fishery for school, large school, and small medium ABT will open beginning June 13, 1997. The Angling category fishery for large school and small medium ABT will close in the southern area only (Delaware and states south) on June 27, 1997, at 11:30 p.m. local time. The northern Angling category fishery for large school and small medium ABT, and the Angling category fishery for school ABT in all areas, will remain open until the effective date of a closure, which will be announced in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: John Kelly, 301-713-2347, or Mark Murray-Brown, 508-281-9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) governing the harvest of ABT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 285. Section 285.22 subdivides the U.S. quota recommended by the International Commission for the Conservation of Atlantic Tunas among the various domestic fishing categories.

NMFS is required, under § 285.20(b)(1), to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the catch of ABT will equal the quota and publish a **Federal Register** announcement to close the applicable fishery.

On February 21, 1997, NMFS amended the regulations governing the Atlantic bluefin tuna (ABT) fisheries to provide authority for NMFS to close and/or reopen all or part of the Angling category in order to provide for further distribution of fishing opportunities throughout the species range (62 FR 8634, February 26, 1997). The regulatory amendments were necessary to increase the geographic and temporal scope of data collection from the scientific monitoring quota established for the United States. Additionally, the authority for interim closures facilitates a more equitable geographic and temporal distribution of fishing opportunities for all fishermen in the Angling category, thus furthering

domestic management objectives for the Atlantic tuna fisheries.

On March 2, 1997, based on catch estimates obtained through angler interviews, NMFS closed the Angling category for school, large school, and small medium ABT in all areas (62 FR 9376, March 3, 1997). NMFS announced the possibility of reopening the Angling category fishery upon the determination that the bluefin had migrated further north, and that the effective date of reopening would be published in the **Federal Register**.

Angling Category Reopening

NMFS has determined, based on catch reports from anglers fishing for other large pelagic species such as yellowfin tuna and anglers fishing for bluefin tuna under the catch and release program, that bluefin tuna have begun to migrate northward.

NMFS is limiting to 2 weeks the opening period for large school and small medium ABT in the southern area (waters off Delaware and states south (south of 38°47' N. lat.)) based on preliminary estimates of catches in

North Carolina, the available quota, and expected catch rates of large school and small medium ABT. Fishing for, catching, possessing, or landing any large school or small medium ABT in the southern area must cease by 11:30 p.m. local time on June 27, 1997. After the closure, anglers aboard a vessel holding an Atlantic tunas permit may continue to fish for ABT 47 inches (119 cm) or greater under the NMFS tag and release program (50 CFR 285.27). The northern Angling category fishery for large school and small medium ABT, and the Angling category fishery for school ABT in all areas, will remain open until further notice.

Catch Limit

NMFS previously adjusted the daily catch limit for the Angling category fishery for ABT to one fish per vessel (61 FR 66618, December 18, 1996), which may be from the school, large school, or small medium size class (measuring 27–73"); due to increased participation in the fishery and anticipated catch rates, this daily catch limit remains in effect. Additionally, the

catch limit for trophy size class ABT (large medium and giant ABT, measuring 73" and greater) remains at one per vessel per year.

This action is being taken to facilitate a geographic and temporal distribution of fishing opportunities for all fishermen in the Angling category, thus furthering domestic management objectives for the Atlantic tuna fisheries. This action also facilitates data collection from the scientific monitoring quota established for the United States over the greatest geographic and temporal range.

Classification

This action is taken under 50 CFR 285.20(b)(1) and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 971 *et seq.*

Dated: June 12, 1997.

Gary C. Matlock,

*Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.*
