Bureau of Reclamation

Pima-Maricopa Irrigation Project Final Programmatic Environmental Impact Statement

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of the final programmatic environmental impact statement; INT-FES 97-30, Filed September 26, 1997.

SUMMARY: The Gila River Indian Community (Community) and the Bureau of Reclamation (Reclamation) have prepared a Final Programmatic Environmental Impact Statement (PEIS) on the Pima-Maricopa Irrigation Project (Project) in compliance with the National Environmental Policy Act of 1969, as amended, and other applicable environmental laws. The purpose of the final PEIS is to assist in decision making by the Commissioner of Reclamation regarding the approval of construction-related expenditures of funds authorized for the Central Arizona Project (CAP) to implement portions of the Project within the constraints of law. Any project that involves a major Federal action, such as Federal funding, permitting or approval, must comply with NEPA.

This final PEIS describes four alternatives for rehabilitation of 66,000

acres and new development of 80,330 acres of irrigated agricultural lands. The proposed action is to rehabilitate San Carlos Indian Irrigation Project (SCIIP) facilities and build new facilities both on and off the Reservation. Ultimate project size would be 146,330 acres, which will enable the Gila River Indian Community to better utilize water supplies and provide additional economic employment opportunities. A No Federal Action alternative is also described.

The Community is the Project proponent and is responsible for the preparation of this final PEIS through a Self-Governance Agreement with Reclamation. Reclamation is responsible for disbursing CAP-related Federal funds and functions as the lead Federal agency for the Project. The Bureau of Indian Affairs (BIA) is a cooperating agency in this process because of its trust responsibility and administration of SCIIP.

ADDRESSES: Single copies of the final PEIS may be obtained on request. Requests for copies should be addressed to: Mr. Bruce D. Ellis (PXAO-1500), Bureau of Reclamation, PO Box 9980, Phoenix, AZ 85068. Copies may also be requested by telephone at (602) 395-5683.

Copies of the final PEIS are available for inspection at the address above and also at the following locations:

SUPPLEMENTARY INFORMATION: The recommended plan proposes

construction of a common-use irrigation system to deliver water to 146,330 acres within the Gila River Indian Reservation (Reservation) and to rehabilitate SCIIP Joint Works facilities. The recommended plan, known as the Project, represents a component of the Community's Master Plan for Land and Water Use (Franzoy Corey, 1985). The Master Plan identifies the Community's major goals and preferences for improving and developing Reservation land and water resources.

The Project would support the continued role of agriculture as a primary element of the Community's traditional economy and way of life. The Project would enhance economic growth, development and self-sufficiency of the Community. The Project has the potential to significantly improve the standard of living for Community members. No significant changes have been made to the recommended plan as presented in the draft PEIS (DEIS 96-46).

The final PEIS presents the recommended plan, alternatives, and the no Federal action alternative. The document describes the existing environment and analyzes, at a programmatic level, the environmental consequences of project construction. The final PEIS also includes responses to comments received during the 60-day public review and hearing process on the draft statement.

Dated: September 26, 1997.

Assistant Regional Director.
