II. Information Collections

EPA is seeking comments on the following Information Collection Request.

Title: Asbestos-Containing Materials in School Rule and Model Accreditation Plan (MAP) Rule, EPA ICR No. 1365.05, OMB No. 2070-0091. Expires March 31, 1998.

Abstract: The Asbestos Hazard Emergency Response Act (AHERA) requires LEAs to conduct inspections, develop management plans, and design or conduct response actions with respect to the presence of asbestos-containing materials in school buildings. AHERA also requires states to develop model accreditation plans for persons who perform asbestos inspections, develop management control plans, and design or conduct response actions. This information collection addresses the burden associated with recordkeeping requirements imposed on LEAs by the asbestos in schools rule, and reporting and recordkeeping requirements imposed on states and training providers related to the model accreditation plan rule. Responses to the collection of information are mandatory (see 40 CFR part 763, Subpart E).

Burden Statement: The burden to respondents for complying with this ICR is estimated to total 2,367,293 hours per year with an annual cost of \$57,149,211. These totals are based on an average burden ranging between 6 and 140 hours per response, depending upon the category of respondent, for an estimated 107,551 respondents making one or more responses annually. These estimates include the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
