#### Cannelton Hydroelectric Project LP; Notice of Availability of Final Environmental Assessment

October 8, 1997.

A final environmental assessment (FEA) is available for public review. The FEA is for an application to amend the Cannelton Hydroelectric Project. The licensee proposes to eliminate the powerhouse by adding 240 small generating units that would be located upstream of the tainter gates within the dam's tainter gate bays and to change the approved transmission line. The FEA finds that approval of the application would not constitute a major federal action significantly

affecting the quality of the human environment. The Cannelton Hydroelectric Project is located on the Ohio River in Hancock County, Kentucky.

The FEA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the FEA can be viewed in the Public Reference Branch, Room 2A, of the Commission's offices at 888 First Street, NE., Washington, DC 20426.

The project is located near Cordova, Alaska. The DEA contains the staff's analysis of the potential environmental impacts of the project and has concluded that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

Copies of the DEA are available for review in the Public Reference Room, Room 2A, of the Commission's offices at 888 First Street NE., Washington, DC 20426.

Any comments should be filed within 30 days from the date of this notice and should be addressed to Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. For further information, contact Michael Henry,

### FOR FURTHER INFORMATION OR A COPY

**CONTACT:** Sandy Farmer at EPA by phone on (202) 260-2740 or by e-mail: "farmer.sandy@epamail.epa.gov," and refer to EPA ICR No. 0586.08 and OMB Control No. 2070-0054.

### SUPPLEMENTARY INFORMATION:

*Review Requested:* This is a request to renew a currently approved information collection pursuant to 5 CFR 1320.12.

*ICR Numbers:* EPA ICR No. 0586.08; OMB Control No. 2070-0054.

*Current Expiration Date:* Current OMB approval expires on November 30, 1997.

*Title:* TSCA Section 8(a) Preliminary Assessment Information Rule (PAIR).

*Abstract:* Section 8(a) of the Toxic Substances Control Act (TSCA) authorizes EPA to promulgate rules under which manufacturers, importers and processors of chemical substances and mixtures must maintain records and submit reports to EPA. One of the rules EPA has promulgated under TSCA section 8(a) is the Preliminary Assessment Information Rule (PAIR). EPA uses PAIR to collect information to identify, assess and manage human health and environmental risks from chemical substances, mixtures and categories. PAIR requires chemical manufacturers and importers to complete a standardized reporting form to help evaluate the potential for adverse human health and environmental effects caused by the manufacture or importation of identified chemical substances, mixtures or categories. Chemicals identified by EPA or any other federal agency, for which a justifiable information need for production, use or exposure-related data can be satisfied by the use of the PAIR are proper subjects for TSCA section 8(a) PAIR rulemaking. In most instances the information that EPA receives from a PAIR report is sufficient to satisfy the information need in question.

Responses to the collection of information are mandatory (see 40 CFR part 712). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

*Burden Statement:* The annual public reporting burden for this collection of information is estimated to be approximately 30 hours per response for an estimated 48 respondents making one or more submissions of information annually. These estimates include the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes

of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for these regulations are displayed in 40 CFR part 9.

### *Respondents/Affected Entities:*

Entities potentially affected by this action are those persons who manufacture or import chemical substances, mixtures or categories.

*Estimated No. of Respondents:* 48.

*Estimated Total Annual Burden on Respondents:* 3,489 hours.

*Frequency of Collection:* On occasion.

*Changes in Burden Estimates:* There is an increase of 1,543 hours in the total estimated respondent burden as compared with that identified in the information collection request most recently approved by OMB, from 1,946 hours currently to an estimated 3,489 hours. This increase is due to both an increase in the number of respondents and an increase in the number of forms submitted to EPA in recent years.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: October 8, 1997.
