SUPPLEMENTARY INFORMATION: Voluntary Product Standard PS 2-92 establishes inspection, test, and labeling procedures for assessing the acceptability of wood-based structural-use panels for construction sheathing and single-floor applications for a variety of products; namely, plywood, wafer board, oriented strand board, structural particle board, and composite panels. It provides performance requirements, adhesive bond durability, panel construction and workmanship, dimensions and tolerances, marking, and moisture content of structural-use panels. The Standard classifies panels by exposure durability and by grade. It provides test methods, a glossary of trade terms and definitions, and a quality certification program whereby agencies can inspect, sample, and test products for qualification under this Standard. Information regarding reinspection practices is provided in an appendix.

PS 2-92, published in 1992, was developed and is maintained in accordance with Department "Procedures for the Development of Voluntary Product Standards" established in Part 10, Title 15, of the Code of Federal Regulations (15 CFR Part 10, as amended; 51 FR 119 dated June 20, 1986).

Section 10.10 of the Procedures requires that each VPS standard be reviewed by the Department with such assistance of the Standing Committee (responsible for maintaining the standard) or others, as may be deemed appropriate by the Department, within five years after initial issuance or last revision of the standard.

Upon completion of the review of PS 2-92, the Standing Committee for PS 2-92 and NIST will act to reaffirm, amend,

revise, or withdraw the standard, as appropriate.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

National Estuarine Research Reserve System

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of Public Meeting and Intent to Prepare a Draft Environmental Impact Statement.

SUMMARY: In accordance with the National Environmental Policy Act and with section 315 of the Coastal Zone Management Act of 1972; as amended, the State of Florida and the National Oceanic and Atmospheric Administration (NOAA) intend to conduct a public scoping meeting on the proposed Guana Tolomato Matanzas (GTM) National Estuarine Research Reserve (NERR) in Florida to solicit comments on significant issues related to the preparation of a Draft Environmental Impact Statement (DEIS) and Draft Management Plan (DMP). The DEIS and DMP address research, monitoring, education and resource protection needs for the reserve.

DATE AND TIME: Wednesday, December 10, 1997 at 7:00 p.m.

ADDRESSES: St. Johns County Auditorium, Government Complex, 4020 Lewis Speedway, St. Augustine, Florida 32095.

FOR FURTHER INFORMATION CONTACT:

Anna Marie Hartman, Bureau of Coastal and Aquatic Managed Areas, Division of Marine Resources, Department of Environmental Protection at (850) 488-3456; or Nathalie Peter, Sanctuaries and Reserves Division, Office of Ocean and Coastal Resource Management, NOAA, at (301) 713-3132, ext. 119.

SUPPLEMENTARY INFORMATION: In October 1997, NOAA Sanctuaries and Reserves Division (SRD) approved the nomination of the Guana Tolomato Matanzas (GTM) estuarine systems as a proposed National Estuarine Research Reserve. Research reserves provide

natural coastal habitats as field laboratories for baseline ecological studies and education programs. Research and monitoring programs are designed to enhance scientific understanding of the coastal environment and aid in resource management decision making.

The proposed GTM Reserve encompasses approximately 53,333 acres of publicly owned lands and waters in St. Johns and Flagler Counties on the east coast of Florida. It consists of two sites: the Guana River and Tolomato River estuarine system located north of St. Augustine and the Matanzas River south of St. Augustine. The proposed reserve is an area important to many resident and migratory fish and waterfowl and a variety of threatened and endangered species, including the manatee, the least tern, and the loggerhead, green and leatherback turtles. Major habitat types include beach dunes, salt and freshwater marshes, cypress and hardwood swamps, shell mounds, and xeric hammocks. The Matanzas Inlet is the last naturally occurring inlet on the east coast of Florida that has not been subject to dredging and other manmade disturbances.

The Department of Environmental Protection (DEP) has developed a draft management plan for the NERR which identifies specific needs and priorities related to research, monitoring, education, and stewardship at the proposed site. It also presents draft action plans for administration, a volunteer program, public access, facilities/construction, and boundaries/land acquisition.

At the public meeting, DEP and NOAA will provide a synopsis of the draft management plan and will solicit comments on significant environmental issues that will be incorporated into a DEIS.

The public meeting will be held in St. Augustine, Florida at the St. Johns County Auditorium, Government Complex, 4020 Lewis Speedway, on December 10, 1997, from 7:00 p.m. to 9:00 p.m.

Interested parties who wish to submit suggestions, comments or substantive information regarding the scope or content of the proposed DEIS/DMP are invited to attend the above meeting. Parties who wish to respond in writing should do so by December 26, 1997, to Anna Marie Hartman, Department of Environmental Protection, Division of Marine Resources, Bureau of Coastal and Aquatic Managed Areas, 3900 Commonwealth Boulevard, MS 235 Tallahassee, Florida 32399-3000, or Nathalie Peter, NOAA Sanctuaries and

Reserves Division, 1305 East-West Highway N/ORM2, Silver Spring, MD 20910.
