NATIONAL CREDIT UNION ADMINISTRATION

Information Collection; Comment Request for Re-Clearance

February 14, 1997.

The National Credit Union Administration (NCUA) intends to submit the following public information collection request to the Office of Management and Budget (OMB) for review and re-clearance under the Paperwork Reduction Act of 1995 (P.L. 104-13, 44 U.S.C. Chapter 35). This information collection is published to obtain comments from the public. Public comments are encouraged and will be accepted for 60 days from the date listed at the top of this page in the Federal Register.

Copies of the information collection request, with applicable supporting documentation, may be obtained by calling the Acting NCUA Clearance Officer, Marijean Brown, (703-518-6413). Comments and/or suggestions regarding the information collection request should be directed to Mrs. Brown at the National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314-3428; Fax No. (703) 518-6433; E-Mail Address: marijean@ncua.gov within 60 days from the date of this publication in the Federal Register.

National Credit Union Administration

OMB Number: 3133-0024.

Form Number: None.

Type of Review: Re-clearance, without change, of a currently approved collection.

Title: Mergers of Federally Insured Credit Unions.

Description: Part 708b of NCUA's regulations sets forth the procedures for credit union mergers.

Respondents: Federal and State Credit Unions.

Estimated No. of Respondents/Recordkeepers: 200.

Estimated Burden Hours Per Response: 15.

Frequency of Response: On occasion.
Estimated Total Annual Burden Hours: 3,000.

Estimated Total Annual Cost: \$44,640.

OMB Number: 3133-0035.

Form Number: None.

Type of Review: Re-clearance, without change, of a currently approved collection.

Title: Trustees and Custodians of Pension Plans.

Description: A federal credit union acting as trustee for a retirement plan must maintain individual records for each participant and provide each participant with notice of the insurance status of their account.

Respondents: Federal Credit Unions.

Estimated No. of Respondents/Recordkeepers: 3,877.

Estimated Burden Hours Per Response: 1.

Frequency of Response: On occasion.
Estimated Total Annual Burden Hours: 193,850.

Estimated Total Annual Cost: \$2,884,488.

By the National Credit Union Administration Board on February 6, 1997.
Becky Baker,
Secretary of the Board.

BILLING CODE 7535-01-P

NUCLEAR REGULATORY COMMISSION

Proposed Generic Communication; Loss of Reactor Coolant Inventory and Associated Potential for Loss of Emergency Mitigation Functions While in a Shutdown Condition (M92635)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to issue a generic letter that will request addressees to (1) assess the

susceptibility of their emergency core cooling system (ECCS) to common-cause failure as a result of reactor coolant system (RCS) draindown while in a shutdown condition, and (2) submit certain information, pursuant to § 50.54(f) of Title 10 of the Code of Federal Regulations (10 CFR 50.54(f)), concerning their findings regarding potential pathways for inadvertent RCS drain-down and the suitability of configuration control and operating practices during reactor shutdown cooling. This information will enable NRC staff to verify whether addressees comply and conform with NRC regulatory and license requirements; i.e., are adequately maintaining the residual heat removal safety function to transfer fission product decay heat and other residual heat from the reactor core (General Design Criterion (GDC) 34 of Appendix A to 10 CFR 50), and the ECCS to provide abundant emergency core cooling when required (GDC 35 of Appendix A to 10 CFR part 50). The NRC is seeking comment from interested parties regarding both the technical and regulatory aspects of the proposed generic letter presented under the Supplementary Information heading.

The proposed generic letter has been endorsed by the Committee to Review Generic Requirements (CRGR). The relevant information that was sent to the CRGR will be placed in the NRC Public Document Room. The NRC will consider comments received from interested parties in the final evaluation of the proposed generic letter. The NRC's final evaluation will include a review of the technical position and, as appropriate, an analysis of the value/impact on licensees. Should this generic letter be issued by the NRC, it will become available for public inspection in the NRC Public Document Room.

DATES: Comment period expires March 17, 1997. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to Chief, Rules Review and Directives Branch, U.S. Nuclear Regulatory Commission, Mail Stop T-6D-69, Washington, DC 20555-0001. Written comments may also be delivered to 11545 Rockville Pike, Rockville, Maryland, from 7:30 am to 4:15 pm, Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Muhammad M. Razzaque (301) 415-2882.

SUPPLEMENTARY INFORMATION:

NRC Generic Letter 97-xx: Loss of Reactor Coolant Inventory and Associated Potential for Loss of Emergency Mitigation Functions While in a Shutdown Condition

Addressees

All holders of operating licenses for pressurized-water reactors (PWRs), except those that have certified to the permanent cessation of operations.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this generic letter to request that addressees (1) assess the susceptibility of their emergency core cooling systems (ECCSs) to common-cause failure as a result of reactor coolant system (RCS) draindown while in a shutdown condition, and (2) submit certain information, pursuant to § 50.54(f) of Title 10 of the Code of Federal Regulations (10 CFR 50.54(f)), concerning their findings regarding potential pathways for inadvertent RCS drain-down and the suitability of configuration control and operating practices during reactor shutdown cooling. This information will enable NRC staff to verify whether addressees comply and conform with NRC regulatory and license requirements; i.e., are adequately maintaining the RHR safety function to transfer fission product decay heat and other residual heat from the reactor core (General Design Criterion (GDC) 34 of Appendix A to 10 CFR part 50), and the ECCS to provide abundant emergency core cooling when required (GDC 35 of Appendix A to 10 CFR part 50).

Background

The NRC issued Information Notice (IN) 95-03, "Loss of Reactor Coolant Inventory and Potential Loss of Emergency Mitigation Functions While in a Shutdown Condition," on January 12, 1995, to alert addressees to an incident at the Wolf Creek Plant involving the loss of reactor coolant inventory while the reactor was in a shutdown condition. In that event, operators were attempting to reborate residual heat removal (RHR) train B, while at the same time maintenance personnel were repacking an RHR train A-to-train B crossover isolation valve. Train B is reborated by recirculating water through a loop that contains the RHR system piping, the refueling water storage tank (RWST), a containment spray pump, a manual RWST isolation
