

the coordination process, if it finds that such grants will serve the public interest. These agreements must be signed by all parties to the agreement. In addition, the Commission needs the following information to enable such public interest determinations: a list of parties predicted to receive additional interference from the proposed facility, a showing as to why a grant based on the agreements would serve the public interest, and technical studies depicting the additional interference. Applicants who use a voluntary coordination process should provide the name, address and telephone number of the person who coordinated studies and a description of how the coordination process was open to all interested parties.

The technical showings and interference agreements will be used by FCC staff to determine if the public interest would be served by the grant of the application and to ensure that the proposed facilities will not result in additional interference.

*OMB Approval Number:* 3060-0500.

*Title:* Section 76.607, Resolution of Complaints.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business and other for-profit entities.

*Number of Respondents:* 11,365 cable television systems.

*Estimated Time Per Response:* 1-26 hours.

*Frequency of Response:* On occasion reporting requirement.

*Cost to Respondents:* \$56,825. The annual printing, photocopying and stationery costs associated with the disclosure and recordkeeping requirements accounted for in this collection are estimated to be \$5 per cable system.  $11,365 \text{ systems} \times \$5 = \$56,825$ .

*Total Annual Burden to Respondents:* 306,855 hours. Based on Commission records, there are approximately 11,365 cable television systems in the nation. The average burden for cable systems to advise subscribers at least once each calendar year of the procedures for resolution of complaints is estimated to be one hour per system. This information is assumed to be easily disclosed to subscribers as part of, or attached to, monthly billing statements.  $11,365 \text{ systems} \times 1 \text{ hour} = 11,365 \text{ hours}$ . The average burden for cable systems to undergo recordkeeping procedures for subscriber complaints/resolutions is estimated to be no more than .5 hours per week, or 26 hours per year.  $11,365 \text{ systems} \times 26 \text{ hours} = 295,490 \text{ hours}$ .  $11,365 + 295,490 = 306,855 \text{ total annual burden hours}$ .

*Needs and Uses:* On March 4, 1992, the Commission adopted a Report and Order, FCC 92-61, MM Docket Nos. 91-169 and 85-381 in the matter of cable television technical and operational requirements. This rulemaking added Section 76.607 to the Commission's rules. Section 76.607 requires cable system operators to advise subscribers at least once each calendar year of the procedures for resolution of complaints about the quality of television signals delivered. Section 76.607 also requires that records be maintained by cable system operators on all such subscriber complaint and resolution of complaints for at least a one-year period. The records are used by local franchising authorities to assess the technical performance of cable television systems and to ensure that quality service is being provided to subscribers.

*OMB Approval Number:* 3060-0316.

*Title:* Section 76.305, Records to be maintained locally by cable system operators for public inspection.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business and other for-profit entities.

*Number of Respondents:* 4,670 cable television systems.

*Estimated Time Per Response:* 26 hours.

*Frequency of Response:* On occasion reporting requirement.

*Cost to Respondents:* \$46,700. The annual printing, photocopying and stationery costs associated with the recordkeeping requirements accounted for in this collection are estimated to be \$10 per cable system.  $4,670 \text{ systems} \times \$10 = \$46,700$ .

*Total Annual Burden to Respondents:* 121,420 hours. According to the National Cable Television Association's Cable Television Developments publication, Fall 1997, p. 11, there are an estimated 10,943 cable television systems in the nation, of which approximately 4,670 serve more than 1,000 subscribers. The average burden for each cable system serving more than 1,000 subscribers to comply with Section 76.305 recordkeeping requirements that are not already accounted for in other OMB information collections is estimated to be 26 hours yearly. This estimate is based on FCC staff's knowledge and familiarity with the availability of the data required.  $4,670 \text{ cable systems} \times 26 \text{ hrs. per week} = 121,420 \text{ hours}$ .

*Needs and Uses:* Section 76.305 requires cable television systems having 1000 or more subscribers to maintain a public inspection file containing various records in accordance with the

following Sections of the Commission's rules: Section 76.207 (political file); Section 76.221 (sponsorship identifications); Section 76.79 (EEO records available for public inspection); Section 76.225(c) (commercial records for children's programming); Section 76.601(c) (proof-of-performance test data); Section 76.601(e) (signal leakage logs and repair records); Section 76.701(h) (records for leased access); and records kept regarding the testing and activation of Emergency Alert Systems. Many of the recordkeeping requirements listed have OMB approval under separate information collection Control Numbers. Specifically, the recordkeeping requirements set forth in Section 76.207 are approved under OMB Control Number 3060-0313. The recordkeeping requirements set forth in Section 76.221 are approved under OMB Control Number 3060-0315. The recordkeeping requirements set forth in Section 76.79 are approved under OMB Control Number 3060-0348. The recordkeeping requirements set forth in Section 76.601(e) are approved under OMB Control Number 3060-0332. Finally, the recordkeeping requirements set forth in Section 76.701(h) no longer exist in the Code of Federal Regulations. On May 7, 1997, the Commission released a Memorandum Opinion and Order in MM Docket No. 92-258, FCC 97-156, which amended Section 76.701 and removed subsection (h). This information collection, Control Number 3060-0316, therefore accounts for the remaining recordkeeping requirements set forth in Section 76.305. These records are used by Commission staff in field inspections/investigations, by local public officials and by the public to assess a cable television system's performance and to ensure that the system is in compliance with all of the Commission's applicable rules and regulations.

## FEDERAL COMMUNICATIONS COMMISSION

### Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority; Comments Requested

February 25, 1998.

**SUMMARY:** The Federal Communications Commission, as part of its continuing

effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**DATES:** Persons wishing to comment on this information collection should submit comments May 4, 1998.

**ADDRESSES:** Direct all comments to Judy Boley, Federal Communications Commissions, Room 234, 1919 M St., N.W., Washington, DC 20554 or via internet to jboley@fcc.gov.

**FOR FURTHER INFORMATION CONTACT:** For additional information or copies of the information collections contact Judy Boley at 202-418-0214 or via internet at jboley@fcc.gov.

**SUPPLEMENTARY INFORMATION:**

*OMB Approval Number:* 3060-0331.

*Title:* Section 76.615(b), Notification requirements.

*Form No.:* N/A.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Businesses or other for-profit.

*Number of Respondents:* 1,200.

*Estimated Time Per Response:* .5 hours.

*Estimated Cost per Respondent:* \$55,200, calculated as follows: Postage and stationery costs are estimated to \$1 per notification. (1,200 notifications  $\times$  \$1 = \$1,200.) Section 76.615(b) notifications are also subject to an application fee, pursuant to Section 8 of the Communications Act of 1934, as amended. The current fee is \$45 per notification. (1,200 notifications  $\times$  \$45 = \$54,000. Total costs = \$1,200+\$54,000 = \$55,200.)

*Total Annual Burden:* 600 hours. Section 76.615(b) notifications are filed with the Commission on an as-needed basis. We estimate that the Commission currently receives approximately 1,200 Section 76.615(b) notifications annually. The average burden on each licensee is .5 hours per notification. (1,200 notifications  $\times$  .5 = 600 hours.)

*Frequency of Response:* On occasion reporting requirement.

*Needs and Uses:* Section 76.615(b) requires that cable TV system operators notify the Commission before transmitting any carrier or other signal component with an average power level across a 25 KHz bandwidth in any 160 microsecond time period equal to or greater than 10-4 watts at any point in the cable distribution system on any new frequency or frequencies in the aeronautical frequency bands. The notifications are used by Commission staff to locate and eliminate harmful interference as it occurs, to help assure safe operation of aeronautical and marine radio services and to minimize the possibility of interference to these safety-of-life services.
