#### SUPPLEMENTARY INFORMATION:

##### Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Rounds Agreements Act.

##### Background

On April 24, 1997 (62 FR 19988), the Department initiated an administrative review of the antidumping duty finding on viscose rayon staple fiber from Finland, covering the period March 1, 1996 through February 28, 1997. On December 10, 1997 (62 FR 65063), the Department published the preliminary determination in this review.

##### Postponement of Final Results of Review

Section 751(a)(3)(A) of the Act requires the Department to make a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within the time period, section 751(a)(3)(A) allows the Department to extend this time period to 180 days after the date on which the preliminary determination is published.

Because of the complexity of the scope issues involved in this review, we determine that it is not practicable to complete this review within the original time frame.

Accordingly, the deadline for issuing the final results of this review will be no later than 180 days from the publication of the preliminary determination (June 8, 1998).

These extensions are in accordance with section 751(a)(3)(A) of the Act (19 U.S.C. 1675 (a)(3)(A)).

Dated: March 20, 1998.

#### SUPPLEMENTARY INFORMATION:

##### A. Purpose

Title IX of the Federal Acquisition Streamlining Act of 1994 (the Act) amended the Office of Federal Procurement Policy Act (41 U.S.C. 401, *et seq.*) by adding new sections regarding the establishment of a program for the development and

implementation of a Federal Acquisition Computer Network (hereinafter referred to as FACNET) which allows electronic interchange of procurement information between the private sector and the Federal Government and among Federal agencies. Specific functions of FACNET are set forth under Section 30 of the Act.

Regulatory coverage on FACNET is included under FAR Subpart 4.5—Electronic Commerce in Contracting. FAR section 4.503 requires contractors to provide registration information to the Central Contractor Registration in order to conduct business through electronic commerce (EC) with the Federal Government. Contractor registration information is collected electronically as a prerequisite for conducting EC with the Federal Government. The process for collection of contractor information uses the Federal Implementation Conventions ANSI X12, Trading Partner Profile, in accordance with the Federal Information Processing Standards 161 (FIPS). These standards are published by the National Institute for Standards and Technology (NIST). The information required to be submitted as part of contractor registration is the same as that currently provided by the SF 129, Solicitation Mailing List Application; the SF 3881, ACH vendor/Miscellaneous Payment Enrollment Form for paper transactions. In addition, information pertaining to a contractor assignment of commercial and Government entity (CAGE) code (where applicable); electronic data interchange (EDI) capabilities, including ANSI X12 transaction set and version number status for production, testing, sending and receiving; and the registrant's value added network (VAN) or value added service (VAS) electronic communications number also needs to be provided as part of the registration process. Requiring information consistent with the existing forms that Government contractors are familiar with simplifies the process of gathering current, factual data to input into the Registration System. The additional information is information contractors should have readily available when they have established EC/EDI capability.

The information submitted by contractors will permit the Central Contractor Registration to establish a central repository for all vendors doing business with the Federal Government, information that is accessible by all Government contracting activities

## B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 15 minutes per response,

including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 100,000; responses per respondent, 1; total annual responses, 100,000; preparation hours per response, .25; and total response burden hours, 25,000.

## C. Annual Recordkeeping Burden

The annual recordkeeping burden is estimated as follows: Recordkeepers, 100,000; hours per recordkeeper, .25; and total recordkeeping burden hours, 25,000.
