

E. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 23, 1998. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2). EPA encourages interested parties to comment in response to the proposed rule rather than petition for judicial review, unless the objection arises after the comment period allowed for in the proposal.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference,

Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Note: Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1982.

Dated: April 2, 1998.

John P. DeVillars,

Regional Administrator, Region I.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart H—Connecticut

2. Section 52.370 is amended by adding paragraph (c)(73) to read as follows:

§ 52.370 Identification of plan.

* * * * *

(c) * * *

(73) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 3, 1996.

(i) Incorporation by reference.

(A) Letter from the Connecticut Department of Environmental Protection dated June 3, 1996, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8036, dated May 6, 1996, for Risdon Corporation, effective on that date. The State order define and impose alternative RACT on certain VOC emissions at Risdon Corporation in Danbury, Connecticut.

3. In § 52.3854, Table 52.385 is amended by adding a new entry to existing state citations for Section 22a–174–20, “Control of Organic Compound Emissions” to read as follows:

§ 52.385 EPA-approved Connecticut regulations.

* * * * *

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 52**

[MO 046–1046; FRL–6001–2]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is taking final action to approve revisions to Missouri Rule 10 CSR 10–2.330, “Control of Gasoline Reid Vapor Pressure,” submitted by the Missouri Department of Natural Resources (MDNR) on November 13, 1997. This revision sets a summertime

gasoline Reid Vapor Pressure (RVP) limit of 7.2 pounds per square inch (psi), and 8.2 psi for gasoline containing at least 9.0 percent by volume but not more than 10.0 percent by volume ethanol, for gasoline distributed in Clay, Platte, and Jackson Counties in Missouri. This revision is necessary to ensure that the area continues to maintain the National Ambient Air Quality Standard (NAAQS) for ozone.

DATES: This rule is effective on May 26, 1998.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the: Environmental Protection Agency, Air Planning and Development Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Stan Walker at (913) 551–7494.

SUPPLEMENTARY INFORMATION:

I. Background

On March 24, 1997 (62 FR 13849), the EPA proposed to approve the incorporation of Missouri Rule 10 CSR 10–2.330 into the State Implementation Plan (SIP). This revision, which limits the RVP of gasoline sold in the Missouri portion of the Kansas City metropolitan area, is necessary to help the Kansas City area maintain the NAAQS for ozone.

The state emergency rule was adopted and approved by the Missouri Air Conservation Commission (MACC) after proper public notice and hearing procedures. The emergency rule became effective on May 1, 1997, and expired on October 27, 1997. The state's permanent rule has undergone proper public notice and hearing and was adopted at the June 26, 1997, public hearing by the MACC, and became effective on October 30, 1997.

The EPA proposed approval of the state's permanent rule using parallel processing procedures. Under these procedures, the EPA proposed to approve Missouri's rule based on adoption of a comparable final permanent rule. The EPA received no comments on its proposed approval.

On October 9, 1997, the EPA gave final conditional approval to Missouri rule 10 CSR 10-2.330. Full approval was contingent upon Missouri submitting the final permanent rule by November 30, 1997. Missouri has since completed its rule adoption procedures for the permanent rule and submitted the rule on November 13, 1997. Therefore, the EPA is taking final action to approve this revision to Missouri's SIP.

In accord with section 211(c)(4)(C), the EPA is able to approve this fuel control measure because the state of Missouri demonstrated that the measure is necessary to achieve the national primary and secondary ambient air quality standard. The EPA also approves the state fuel requirement as necessary because no other measures would bring about timely attainment or, if other measures exist, they are unreasonable or impracticable.

For additional background on this action and the EPA's detailed rationale for approval, please refer to the technical support document (TSD) for the aforementioned notice of proposed rulemaking (62 FR 13849) and the TSD for this final rulemaking.

II. Final Action

The EPA is taking final action to give full approval to the SIP revision concerning Missouri Rule 10 CSR 10-2.330, "Control of Gasoline Reid Vapor Pressure," submitted by MDNR.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors, and in relation to relevant statutory and regulatory requirements.

Full approval was contingent upon Missouri completing its rule adoption procedures prior to expiration of the emergency rule, and submitting the permanent rule by November 30, 1997. Missouri submitted the permanent rule on November 13, 1997, thus meeting the aforementioned condition.

III. Administrative Requirements

A. Regulatory Flexibility Act

SIP approvals under section 110 and subchapter I, Part D of the Clean Air Act

(CAA) do not create any new requirements but simply approve requirements that the state is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, the Administrator certifies that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids the EPA to base its actions concerning SIPs on such grounds (*Union Electric Co. v. U.S. E.P.A.*, 427 U.S. 246, 256-66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2)).

B. Executive Order 12866

The Office of Management and Budget has exempted this regulatory action from Executive Order 12866 review.

C. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, the EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to state, local, or tribal governments in the aggregate; or to private sector, of \$100 million or more. Under section 205, the EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires the EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

The EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated costs of \$100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves preexisting requirements under state or local law, and imposes no new requirements. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, result from this action.

D. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. § 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must

submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. § 804(2).

E. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 23, 1998. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review, nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: April 2, 1998.

William Rice,

Acting Regional Administrator, Region VII.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart AA—Missouri

2. Section 52.1320 is amended by adding paragraph (c)(105) to read as follows:

§ 52.1320 Identification of plan.

* * * * *

(c) * * *

(105) Revision to the Missouri SIP submitted by the Missouri Department of Natural Resources on November 13, 1997.

(i) Incorporation by reference.

(A) Missouri Rule, 10 CSR 10-2.330, Control of Gasoline Reid Vapor Pressure, effective October 30, 1997.

3. Section 52.1323 is amended by adding paragraph (m) to read as follows:

§ 52.1323 Approval status.

* * * * *

(m) The Administrator approves Missouri rule 10 CSR 10-2.330 under § 52.1320(c)(105). This fulfills the requirements of the conditional approval granted effective November 10, 1997, as published on October 9, 1997.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[MO 053-1053a; FRL-6003-2]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants; Missouri; Control of Landfill Gas Emissions From Existing Municipal Solid Waste Landfills

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The EPA is approving the Missouri plan for implementing the municipal solid waste (MSW) landfill emission guideline (EG) at 40 CFR part 60, subpart Cc, which was required pursuant to section 111(d) of the Clean Air Act (Act). The state's plan was submitted to the EPA on January 26, 1998, in accordance with the requirements for adoption and submittal of state plans for designated facilities in 40 CFR part 60, subpart B. The plan establishes emission limits for existing MSW landfills, and provides for the implementation and enforcement of those limits.

DATES: This action is effective June 23, 1998 unless by May 26, 1998 adverse or critical comments are received. If adverse comments are received, EPA will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: Comments may be mailed to Wayne Kaiser, Environmental Protection Agency, Air Planning and Development Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101.

Copies of the documents relevant to this action are available for public inspection during normal business hours at the Environmental Protection Agency, Air Planning and Development Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Wayne Kaiser at (913) 551-7603.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 111(d) of the Act, the EPA has established procedures whereby states submit plans to control certain existing sources of "designated pollutants." Designated pollutants are defined as pollutants for which a standard of performance for new sources applies under section 111, but which are not "criteria pollutants" (i.e., pollutants for which national ambient air quality standards are set pursuant to sections 108 and 109 of the Act). As required by section 111(d) of the Act, the EPA established a process at 40 CFR part 60, subpart B, similar to the process required by section 110 of the Act (regarding state implementation plan approval) which states must follow in adopting and submitting a section 111(d) plan. Whenever the EPA promulgates a new source performance standard (NSPS) that controls a designated pollutant, the EPA establishes emissions guidelines (EG) in accordance with 40 CFR 60.22 which contain information pertinent to the control of the designated pollutant from that NSPS source category (i.e., the "designated facility" as defined at 40 CFR 60.21(b)). Thus, a state's section 111(d) plan for a designated facility must comply with the EG for that source category as well as 40 CFR part 60, subpart B.

On March 12, 1996, the EPA published an EG for existing MSW landfills at 40 CFR part 60, subpart Cc (40 CFR 60.30c through 60.36c) and NSPS for new MSW landfills at 40 CFR part 60, subpart WWW (40 CFR 60.750 through 60.759). The pollutant regulated by the NSPS and EG is MSW landfill emissions, which contain a mixture of volatile organic compounds (VOC), other organic compounds, methane, and hazardous air pollutants (HAP). To determine whether control is required, nonmethane organic compounds (NMOC) are measured as a surrogate for MSW landfill emissions. Thus, NMOC is considered the designated pollutant. The designated facility which is subject to the EG is each existing MSW landfill (as defined in 40 CFR 60.31c) for which construction, reconstruction, or modification was commenced before May 30, 1991.

Pursuant to 40 CFR 60.23(a), states were required to submit a plan for the control of the designated pollutant to which the EG applies within nine months after publication of the EG, or by December 12, 1996. If there were no designated facilities in the state, then the state was required to submit a negative declaration by December 12, 1996.

II. Analysis of State Submittal

The official procedures for adoption and submittal of state plans are codified in 40 CFR part 60, subpart B, sections 60.23 through 60.26. Subpart B addresses public participation, legal authority, emission standards and other emission limitations, compliance schedules, emission inventories, source surveillance, compliance assurance and enforcement requirements, and cross-references to the MSW landfill EG.

On January 26, 1998, the state of Missouri submitted its section 111(d) plan for MSW landfills for implementing the EPA's MSW landfill EG.

The Missouri plan includes documentation that all applicable subpart B requirements have been met. More detailed information on the requirements for an approvable plan and Missouri's submittal can be found in the Technical Support Document (TSD) accompanying this action, which is available on request.

The Missouri plan cross referenced both the NSPS subpart WWW and EG subpart Cc to adopt the requirements of the Federal rule. The state has ensured, through this cross-reference process, that all the applicable requirements of the Federal rule have been adopted into the state plan. The emission limits, testing, monitoring, reporting and recordkeeping requirements, and other aspects of the Federal rule have been adopted. Missouri rules 10 CSR 10-5.490 and 10 CSR 10-6.310 contain the applicable requirements.

Missouri demonstrated that it has the legal authority to implement and enforce the applicable requirements. The state provided evidence that it complied with the public notice and comment requirements of 40 CFR part 60, subpart B.

III. Final Action

Based on the rationale discussed above and in further detail in the TSD associated with this action, the EPA is approving Missouri's January 26, 1998, submittal of its section 111(d) plan for the control of landfill gas from existing MSW landfills. Since there is no Indian Country in Missouri, this approval encompasses the entire state.

The EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, the EPA is publishing a separate document that will serve as the proposal to approve the state plan revision should relevant adverse
