

As mentioned above, certification of the Engelhard ETX™ kit triggered the 0.10 g/bhp-hr standard for applicable 1979–1989 6V92TA MUI engines. That kit provides three power ratings: 253, 277, and 294 horsepower. DDC will offer the DDC kit in these three power ratings as well: 253, 277, and 294hp.

Engines of urban buses certified to meet California emissions standards are not applicable to the DDC kit discussed in today's **Federal Register** notice. Additionally, the 0.10 g/bhp-hr PM standard is not triggered for engines certified to meet California emission standards. Operators of such urban buses, who choose to comply with program 1, are not required to use equipment certified to the 0.10 g/bhp-hr PM standard until the standard has been triggered for such engines. Operators of urban buses having engines certified to meet California emission standards, and who choose to comply with program 2, may not use the DDC kit described in today's notice to meet program requirements.

As stated in the program regulations (40 CFR 85.1401 through 85.1415), operators must, beginning January 1, 1995, maintain records for each engine in their fleet to demonstrate that they are in compliance with the requirements of the Urban Bus Retrofit/Rebuild Program. These records include purchase records, receipts, and part numbers for the parts and components used in the rebuilding or urban bus engines.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6013–6]

Acid Rain Provisions

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: EPA today announces the allocation of allowances to small diesel refineries for desulfurization of fuel during 1997. The eligibility for and calculation of allowances to small diesel refineries is in accordance with Section 410(h) of the Clean Air Act, implemented at 40 CFR part 73, subpart G.

FOR FURTHER INFORMATION CONTACT:

Kathy Barylski, EPA Acid Rain Division (6204J), 401 M St., SW, Washington DC; telephone (202) 564–9074; or the Acid Rain Hotline at (202) 564–9620.

Electronic copies of this rulemaking and technical support documents can be accessed through the Acid Rain Division website at www.epa.gov/acidrain.

SUPPLEMENTARY INFORMATION: EPA's Acid Rain Program was established by Title IV of the Clean Air Act Amendments of 1990 (CAAA) to reduce

acid rain in the continental United States. The Acid Rain Program will achieve a 50 percent reduction in sulfur dioxide (SO₂) emissions from utility units. The SO₂ reduction program is a flexible market-based approach to environmental management. As part of this approach, EPA allocates “allowances” to affected utility units. Each allowance is a limited authorization to emit up to one ton of SO₂. At the end of each calendar year, each unit must hold allowances in an amount equal to or greater than its SO₂ emissions for the year. Allowances may be bought, sold, or transferred between utilities and other interested parties. Those utility units whose annual emissions are likely to exceed their allocations may install control technologies or switch to cleaner fuels to reduce SO₂ emissions or buy additional allowances.

Section 410(h) of the Clean Air Act provides allowances for small diesel refineries that desulfurize diesel fuel from October 1, 1993 through December 31, 1999. Small refineries are not otherwise affected by the Acid Rain Program and do not need the allowances to comply with any provision of the Clean Air Act. Thus, the allowances serve as a financial benefit to small diesel refineries desulfurizing diesel fuel.

The following table lists allowances to be allocated to eligible refineries for desulfurization of diesel fuel during calendar year 1997.

Refiner	Refinery/location	Allocation

A total of 27,656 allowances are allocated to 17 refineries, which produced

55,111 thousand barrels of desulfurized

diesel fuel. These allowances have a compliance year of 1998.

Requests for allowances for desulfurization during 1998 are due no later than April 1, 1999. Allowances allocated in 1999 will have a compliance year of 1999.
