The following comments pertain to Shirt, Sleeping.

Comments were received from the current contractor for the sleeping shirts. The contractor indicated that the shirts are an important part of one of its plants' production during certain months of the year.

While these shirts may be important to one of the contractor's three plants for part of the year, the Committee looks at the overall impact of a Procurement List addition on the contractor's total sales when it makes its impact determinations. The impact of this addition on the contractor's total sales is very small, and well below the level which the Committee normally considers to be severe adverse impact. The Committee is only adding ten percent of the Government requirement for the shirts to the Procurement List at this time, which will leave 50 percent of the requirement available for competitive procurement from this contractor or its competitors. The Committee's earlier addition to the Procurement List of 40 percent of the Government requirement caused only a slight decline in the contractor's sales. Consequently, the Committee does not believe that addition of the sleeping shirts to the Procurement List will have a severe adverse impact on the contractor.

The following comments pertain to Central Facility Management, The Jimmy Carter Presidential Library, Atlanta, Georgia.

Comments were received from the current contractor for this service. The contractor noted that it expects a severe reduction in its total sales during this
