These recommendations are submitted to the Government as value engineering change proposals (VECP's) and they must include specific information. This information is needed to enable the Government to evaluate the VECP and, if accepted, to arrange for an equitable sharing plan.

SUPPLEMENTARY INFORMATION:

A. Purpose

When the same item or class of items is being acquired by more than one agency, the exchange and coordination of pertinent information, particularly cost and pricing data, is necessary to promote uniformity of treatment of major issues and the resolution of particularly difficult or controversial issues. For this reason, the contracting officer, early in a negotiation of a contract, or in connection with the review of a subcontract, must request the contractor to furnish information as to the contractor's or subcontractor's previous Government contracts and subcontracts for the same or similar end items and major subcontractor components.

This information is particularly beneficial during the period of acquisition planning, presolicitation, evaluation, and preaward survey. The information is used to determine a firm's responsibility.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 2,000; responses per respondent, 10; total annual responses, 20,000; preparation hours per response, .25; and total response burden hours, 5,000.

SUPPLEMENTARY INFORMATION:

A. Purpose

Presolicitation notices are used by the Government for several reasons, one of which is to aid prospective contractors in submitting proposals without undue expenditure of effort, time, and money. The Government also uses the presolicitation notices to control printing and mailing costs. The presolicitation notice response is used to determine the number of solicitation documents needed and to assure that interested offerors receive the solicitation documents. The responses are placed in the contract file and referred to when solicitation documents are ready for mailing. After mailing, the responses remain in the contract file and become a matter of record.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 10 minutes per completion, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
