Centers for Disease Control and Prevention

[Announcement Number 98084]

Notice of Availability of Funds for 1998; State Cardiovascular Health Programs

Introduction

The Centers for Disease Control and Prevention (CDC), announces the availability of fiscal year (FY) 1998 funds for a cooperative agreement program for State-based cardiovascular health programs. This announcement is the first of its kind and contains cardiovascular health program design components considered essential to increasing the leadership of State health departments in cardiovascular disease prevention and control. The essential components are characterized by definition of the cardiovascular disease problem within the State; development of partnerships and coordination among concerned nongovernmental and governmental partners; development of effective strategies to reduce the burden of cardiovascular diseases and related risk factors with an overarching emphasis on heart healthy policies and physical and social environmental changes at all levels as interventions; and monitoring of all the critical aspects of cardiovascular diseases.

To improve the cardiovascular health of all Americans, every State health department should have the capacity, commitment, and resources to carry out comprehensive cardiovascular disease prevention and control programs. Applicants may apply for one, but not both, of the following levels of support:

1. A Core Capacity Program to develop basic cardiovascular disease program functions and activities at the State level such as partnerships and program coordination, scientific capacity, inventory of policy and environmental strategies, State plan for cardiovascular diseases, training and technical assistance, strategies for addressing Priority Populations, and intervention strategies.

2. A Comprehensive Program to implement and disseminate intervention activities throughout the State using health care settings, work sites, schools, media, the government, and community-based organizations as primary modes of intervention for cardiovascular diseases.

One optional enhanced school health program. Additional funding may be available for either a Core Capacity
