

the Plan (IV 62) and it is expected that 50 percent of the seasonal streams (Type 5) will be protected as a result of the mass-wasting protection provisions. The other 50 percent of Type 5 streams receive interim protections as necessary and will be addressed within the Type 5 research and adaptive-management component to be completed within the first 10 years of the Plan. Watershed Analysis can only increase, not decrease, the level of protection these streams receive. Road management is another critical component of the Department of Natural Resources' Plan (IV 62-68).

Provisions for the Olympic Experimental State Forest are described in the Plan on pages IV 81-86, 106-121. In general, the strategy for the Olympic Experimental State Forest provides conservation very similar to the remainder of the Department of Natural Resources Plan, but a higher emphasis is placed on research, landscape assessments, and validation monitoring.

These minimization and mitigation measures described above represent the minimum level of riparian conservation the Department of Natural Resources will provide under the Plan. Several aspects of the Plan, including riparian protection, are subject to adaptive management. To ensure that the mitigation and minimization strategies are effective, the Plan incorporates a variety of aquatic monitoring components that will provide feedback for adaptive management and, if needed, increase riparian protection.

DEPARTMENT OF THE INTERIOR

National Park Service

Keweenaw National Historical Park

AGENCY: National Park Service, Interior.

ACTION: Notice of Availability.

SUMMARY: Availability of Final General Management Plan/Final Environmental Impact Statement for the Keweenaw National Historical Park in Houghton County, Michigan.

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, the National Park Service (NPS) announces the availability of the final General Management Plan/Final Environmental Impact Statement (GMP/FEIS) for Keweenaw National Historical Park. The draft General Management Plan/Draft Environmental Impact Statement for the park was on a 60-day public review from August 29, 1997, to October 31, 1997.

The NPS will manage resources it owns in the Quincy and Calumet Units and provide interpretive and other services in conjunction with the programs of Keweenaw National Historical Park as described in the GMP/FEIS. The action is in response to a mandate by Congress in Public Law 102-543, an Act to establish Keweenaw National Historical Park (16 U.S.C. 410yy *et seq.*). The GMP/FEIS was prepared by the NPS.

The NPS's preferred alternative for Keweenaw National Historical Park is identified in the GMP/FEIS as Alternative 4 (The Proposed Action). Under the preferred alternative, the NPS would manage NPS-owned resources and work cooperatively with landowners, local and state government agencies, and others to protect cultural and historical resources associated with the copper-mining heritage of the park. Alternative 4 includes a combination of technical and financial assistance, and a traditional park concept. The goal is to create a dynamic national park area where the NPS has a strong public presence and, through community assistance, is a contributing member of a very organized and active partnership of local government and community groups. The park boundary will remain unchanged. Any recommendations to revise the park's boundary would be developed through a future boundary study process that would include public involvement. Congressional approval would be required for any boundary changes.

Three other alternatives are also considered: Alternative 1—No Action, projects a scenario of static or reduced fiscal resources available for the management of the park resulting in a caretaker mode of operation. Alternative 2—Community Assistance, emphasizes community assistance and partnership cooperation to manage and protect

resources; the local communities would be in the forefront of implementing preservation actions and interpretative and educational programs at sites throughout the park. Alternative 3—Traditional Park in the Core Industrial Areas emphasizes a much more traditional park experience in the core industrial areas. The NPS would invest substantially in each of the core industrial areas by acquiring significant properties, conducting resource preservation and interpretive programs, and adaptively using the structures.

DATES: The "no-action" period for this FEIS will end thirty (30) days after the Environmental Protection Agency has listed the availability of the document in the **Federal Register**. A record of decision will follow the no action period.

FOR FURTHER INFORMATION CONTACT: Superintendent, Keweenaw National Historical Park, Frank C. Fiala, P.O. Box 471, Calumet, Michigan 49913-0471, 906-337-3168.

SUPPLEMENTARY INFORMATION: The Keweenaw National Historical Park was established by Public Law 102-543 on October 27, 1992.
