This notice is a re-publication that reflects inclusion of a revised tobacco module that has been determined necessary since the initial publication of a 60-day public comment notice for the 1999 National Household Survey on Drug Abuse on June 3 (63 FR 30244).

Proposed Project

1999 National Household Survey on Drug Abuse—(0930-0110)—Revision—The National Household Survey on Drug Abuse (NHSDA) is a survey of the civilian, noninstitutionalized population of the United States 12 years old and older. The data are used to determine the prevalence of use of tobacco products, alcohol, illicit

substances, and illicit use of prescription drugs. The results are used by SAMHSA, ONDCP, Federal government agencies, and other organizations and researchers to establish policy, direct program activities, and better allocate resources. For 1999, the tobacco component of the core questionnaire will be revised and expanded to permit a more comprehensive set of data on tobacco product use, including information on usual brand.

The sample size of the survey will also be expanded to permit prevalence estimates for each of the fifty states and the District of Columbia. The total annual burden estimate is 97,200 hours as shown below:

	No. of respondents	No. of responses per respondent	Average burden per response (hours)	Total burden (hours)
Household Screener	263,991	1	0.05	13,200
NHSDA Questionnaire	70,000	1	1.20	84,000
Total				97,200

Send comments to Nancy Pearce, SAMHSA Reports Clearance Officer, Room 16-105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.
