#### Endangered Species; Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of an application for modification 6 to incidental take permit 844.

**SUMMARY:** Notice is hereby given that the Idaho Department of Fish and Game at Boise, ID (IDFG) has applied in due form for a modification to a permit that would authorize an incidental take of a threatened anadromous fish species.

**DATES:** Written comments or requests for a public hearing on this application must be received on or before July 24, 1998.

**ADDRESSES:** The application and related documents are available for review in the following offices, by appointment:

Protected Resources Division (PRD), F/NWO3, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400); and

Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401).

Written comments or requests for a public hearing should be submitted to the Chief, PRD, in Portland, OR.

**FOR FURTHER INFORMATION CONTACT:** Robert Koch, PRD (503-230-5424).

**SUPPLEMENTARY INFORMATION:** IDFG requests a permit modification under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

Permit 844 authorizes IDFG an incidental take of adult and juvenile, threatened, naturally produced, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) and adult, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) associated with the State of Idaho's sport-fishing programs. For modification 6, IDFG requests an additional incidental take of adult, threatened, Snake River spring/summer chinook salmon associated with a limited salmon sport fishery on the upper South Fork of the Salmon River. The fishery will target non-listed, artificially propagated, summer chinook salmon. The primary source of take would be the incidental catch, handling, and release of ESA-listed adult fish with an associated catch and release mortality. The specifics of the fishery, including season dates, duration, locations, and mitigative activities are tailored to provide the appropriate level of protection for ESA-listed fish in the watershed. The fishery is proposed to be terminated when quotas are reached or before the onset of spawning activities. The additional take of ESA-listed adult fish associated with the proposed upper South Fork Salmon River salmon fishery is requested in 1998 only. Permit 844 expires on December 31, 1998.

Those individuals requesting a hearing on the application should set out the specific reasons why a hearing would be appropriate (see ADDRESSES). The holding of such a hearing is at the discretion of the Assistant

Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: June 19, 1998.
