Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Projects

1. *Breast Cancer Incidence in an Occupational Cohort Exposed to Ethylene Oxide and in an Occupational Cohort Exposed to Polychlorinated Biphenyls (0920-0366)—National Institute for Occupational Safety and Health (NIOSH)—Extension*—Breast cancer is the most common incident cancer among U.S. women, and the second leading cause of cancer mortality in U.S. women. Increasing numbers of women are employed outside the home, yet few studies of breast cancer etiology have addressed occupational and environmental chemical exposures, and

many cancer studies of industrial cohorts have excluded women. This study will provide information concerning: (1) the incidence of breast cancer in a cohort of women exposed to ethylene oxide (ETO), and (2) the incidence of breast cancer in a cohort of women exposed to polychlorinated biphenyls (PCBs). Both compounds are suspected breast carcinogens. These two cohorts have been previously assembled by NIOSH, and each represents the largest and best defined female study

cohort in the U.S. for the respective exposure.

All women in the existing NIOSH ethylene oxide cohort (n=9,929) and PCB cohort (13,736) will be enrolled in the study. For both cohorts, data from personnel records has been coded into a computer file containing demographic, and work history information. This information will be used to estimate workplace exposures. Vital status has been determined through automated data sources. Questionnaires are currently being mailed to each living

cohort member to obtain information on breast cancer incidence and risk factors for breast cancer. For deceased cohort members, next-of-kin will be asked to provide this information. Other record sources such as death certificates and population-based cancer incidence registries will also be used to identify cancer cases. The diagnosis will be confirmed by medical records. Each questionnaire will take approximately 30 minutes to complete. Total annual burden hours are 12,500.

Respondents	Number of respondents	Number of responses/respondent	Avg. burden/re-sponse (in hours)	Total burden (in hours)
Workers	23,000	1	.50	11,500
Medical providers	2,000	1	.50	1,000

2. Tests and Requirements for Certification and Approval of Respiratory Protective Devices—42 CFR 84—Regulation—(0920–0109)—

Extension—The regulatory authority for the National Institute for Occupational Safety and Health (NIOSH) certification program for respiratory protective devices is found in the Mine Safety and Health Amendments Act of 1977 (30 U.S.C. 577a, 651 et seq., and 657(g)) and the Occupational Safety and Health Act of 1970 (30 U.S.C. 3, 5, 7, 811, 842(h), 844). These regulations have, as their basis, the performance tests and criteria for approval of respirators used by millions of American construction

workers, miners, painters, asbestos removal workers, fabric mill workers, and fire fighters. In addition to benefitting industrial workers, the improved testing requirements also benefit health care workers implementing the current CDC Guidelines for Preventing the Transmission of Tuberculosis. Regulations of the Environmental Protection Agency (EPA) and the Nuclear Regulatory Commission (NRC) also require the use of NIOSH-approved respirators.

NIOSH, in accordance with implementing regulations 42 CFR 84: (1) Issues certificates of approval for

respirators which have met improved construction, performance, and protection requirements; (2) establishes procedures and requirements to be met in filing applications for approval; (3) specifies minimum requirements and methods to be employed by NIOSH and by applicants in conducting inspections, examinations, and tests to determine effectiveness of respirators; (4) establishes a schedule of fees to be charged applicants for testing and certification, and (5) establishes approval labeling requirements. Total annual burden hours are 177,968.

Respondents (section/data type)	Number of respondents	Number of responses/respondent	Average burden/re-sponse (in hours)	Total burden (in hours)

Food and Drug Administration

[Docket No. 92N–0429]

Constantine I. Kostas; Denial of Hearing; Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) denies a request

for a hearing and issues a final order under the Federal Food, Drug, and Cosmetic Act (the act) permanently debarring Constantine I. Kostas, Nine Cedar Mill Rd., Lynnfield, MA 01940, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on its finding that Dr. Kostas was convicted of felonies under Federal law for conduct relating to the development or approval, including the process for development or approval, of a drug product, and conduct relating to
