

Proposed Renewal Project

The EHR Impact Database was established in 1995 to integrate all available information pertaining to the NSF's Education and Training portfolio. Under a generic survey clearance (OMB 3145-0136) data from the NSF administrative database are incorporated and additional information is obtained through initiative-, divisional-, and program-specific data collections.

Use of the Information

This information is required for effective administrative, program monitoring and evaluation, and for measuring attainment of NSF's program goals, as required by the Government Performance and Results Act (GPRA).

Burden on the Public

The total estimate for this collection is 50,000 annual burden hours. This figure is based on the previous 3 years of collecting information under this clearance. The average annual reporting burden is between 2 and 50 hours per 'respondent' who may be an individual or a project site representing groups.

Dated: July 1, 1998.

Acting NSF Reports Clearance Officer.
