

highlight the benefits of exporting and the impact of exports on the U.S. economy. The exhibit, which represents a series of industries and a variety of companies, is located in the Office of the Under Secretary for International Trade. The exhibit will be rotated approximately every four months. The first sector selected was the motor vehicles and automotive parts industry.

The second sector to be displayed is the energy sector. Companies and trade associations in this sector are encouraged to express interest in showcasing their exports of goods and/or services by contacting ITA through the individual listed above. Displayed items may include illustrations, miniaturized or actual models, or actual products. Examples of appropriate displays would include models or illustrations of drilling platforms or refineries, oil and gas pipeline equipment, geologic instrumentation systems, power plants or electric distribution lines that have been constructed overseas and incorporate substantial U.S. products and/or services.

Selection Process

Items will be selected for exhibition on the basis of the following factors:

(1) Items must be produced in, or representative of services exported from, the United States and have at least a 51% U.S. content, including materials, equipment and labor (in the case of large development projects, the applicant should identify substantial U.S. products or services into the completed project). To highlight the impact of exports on small businesses, items will also be considered that are produced by U.S. companies that do not directly export but rather whose goods or services are incorporated into another company's for export.

(2) The items must relate to the industry selected by ITA and be suitable for exhibition in a limited space.

(3) The company must not be owned or controlled, indirectly or directly, by a foreign government.

(4) Items chosen should reflect diversity of company size, location, demographics, and traditional underrepresentation in business.

Other conditions: Displayed items will be considered loans to the Department. Companies will be responsible for shipment of the item to and from the Commerce Department, for obtaining appropriate insurance, and for all related costs.

Time Frame for Applications: Expressions of interest from the energy sector should be received by August 17,

1998. Expressions of interest should be sent to the ITA official identified above.

A **Federal Register** notice will be published subsequently to announce the next sector to be highlighted.
