

the statutory requirement to maintain reporting on a substantial majority of releases for all listed toxic chemicals. Without the Form A, users of TRI data would not have access to any information on these chemicals. The Form A may also serve as a de facto range report, which may be useful to any party interested in amounts being handled at a particular facility or for broader statistical purposes. Additionally, the Form A provides compliance monitoring for enforcement programs and other interested parties with a means to track chemical management activities and verify overall compliance with the rule.

Responses to this collection of information are mandatory (see 40 CFR Part 372) and facilities subject to reporting must either submit a Form A or a Form R.

Burden Statement: The annual public reporting burden for this collection of information is estimated to average 67.8 hour per response for an estimated 13,157 respondents making one or more submissions of information. These estimates include the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for these regulations are displayed in 40 CFR Part 9.

Respondents/Affected Entities: Entities potentially affected by this action are those chemical facilities that manufacture, process or otherwise use certain toxic chemicals listed on the Toxic Release Inventory (TRI) and which are required, under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), to report annually to EPA their environmental releases of such chemicals.

Estimated No. of Respondents: 13,157.

Estimated Total Annual Burden on Respondents: 909,392 hours.

Frequency of Collection: Annual.

Changes in Burden Estimates: There is a decrease of about 82,000 hours in

the total estimated respondent burden as compared with that identified in the information collection request most recently approved by OMB, from 991,301 hours currently to an estimated 909,392 hours. This reflects downward adjustments made in calculating the number of eligible respondents and responses based on TRI reporting data from the 1996 reporting year (the most recent TRI data available). In addition EPA has modified the Form A to permit respondents to make multiple certifications on a single form, with an accompanying change in the number of estimated responses, producing another downward change in the burden to respondents.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: July 16, 1998.
