

Because these human remains are likely from the post-contact period (post-1600 A.D.) and historical documents place the Wabanaki in Maine during this time, these human remains are affiliated with the Micmac, Malecite, Passamaquoddy, Penobscot present-day tribes.

In 1973, human remains representing a minimum of one individual were recovered from a highly disturbed sand dune (71-2) in Farmington Falls, ME by unknown person(s) and have been curated at the Department of Anthropology, University of Maine, since that time. No known individual was identified. No associated funerary objects are present.

Based on the state of preservation, these human remains are believed to date from the Ceramic period into the contact period. Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1973, human remains representing two individuals were removed from Winnock's Neck (site 8-1), Scarborough, ME during investigations by amateur archeologists. These human remains and field notes pertaining to them were subsequently donated to the University of Maine by unknown individual(s). No known individuals were identified. No associated funerary objects are present.

The field notes accompanying these remains indicate they were recovered with three pottery sherds, indicating a likely Ceramic Period date for these human remains. Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1984, human remains representing a minimum of one individual from the Todd site (17-11) Bremem, ME were recovered by a University of Maine research team. No known individual was identified. No associated funerary objects are present.

The Todd site (17-11) has been identified as a shell midden dating to the late Ceramic period (post 1000 A.D.). Archaeological evidence based on the material culture of Maine indicates that the Ceramic Period (c. 1,000 B.C. to the contact period) "is the prehistory of those Algonkian speakers known generally as the Wabenakis; including the Micmac, Malecite, Passamaquoddy, [and] Penobscot."

In 1989, human remains representing a minimum of nine individuals were recovered from the Eddington Bend site (74-8), Eddington, ME during a FERC-required recovery excavation by University of Maine personnel. No known individuals were identified. No associated funerary objects were recoverable.

Based on dental morphology, these individuals have been determined to be Native American. Based on the presence of a highly oxidized and unrecoverable piece of iron in the pit feature with the human remains and apparent iron or steel tool cut marks on the bones, these human remains probably date to the post-contact period. Because these human remains are likely from the post-contact period (post-1600 A.D.) and historical documents place the Wabanaki in Maine during this time, these human remains are affiliated with the Micmac, Malecite, Passamaquoddy, Penobscot present-day tribes.

Based on the above mentioned information, officials of the Department of Anthropology, University of Maine have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of a minimum of 21 individuals of Native American ancestry. Officials of the Department of Anthropology, University of Maine have also determined that, pursuant to 25 U.S.C. 3001 (3)(A), the three objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Department of Anthropology, University of Maine have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity which can be reasonably traced between these Native American human remains and associated funerary objects and the Aroostook Band of MicMacs, Houlton Band of Maliseets, Passamaquoddy Tribe, and the Penobscot Indian Nation.

This notice has been sent to officials of the Aroostook Band of MicMacs, Houlton Band of Maliseets, Passamaquoddy Tribe, and the Penobscot Indian Nation. Representatives of any other Indian tribe that believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Dr. David Sanger, Department of Anthropology, University of Maine, Orono, ME 04469; telephone: (207) 581-1894, before February 27, 1998. Repatriation of the human remains and associated funerary objects to the culturally affiliated tribes may begin

after that date if no additional claimants come forward.

Dated: January 15, 1998.

### Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a consent decree in *United States v. John L. Conner, Jr., et al.*, Civil Action No. B-C-97-85 (E.D. Ark.), was lodged with the United States District Court for the Eastern District of Arkansas on December 19, 1997.

The proposed consent decree would resolve the United States' allegations in the above-referenced enforcement action that Defendants have violated Sections 301 and 404 of the Clean Water Act, 33 U.S.C. 1311 and 1344, by unlawfully discharging dredged or fill material into approximately 70 acres of waters of the United States at twelve different sites in Jackson, Woodruff and Lawrence Counties.

The proposed consent decree would require Defendants: (1) To pay a \$400,000 civil penalty; (2) to restore the three largest violation sites, which total approximately 50 acres; (3) to create approximately 85 acres of wetlands; and (4) to preserve 100 acres of forested land, 95 of which are currently wetlands. The decree would also permanently enjoin Defendants from discharging dredged or fill materials into waters of the United States without an applicable permit.

The Department of Justice will accept written comments relating to the proposed consent decree for thirty (30) days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Attention: Wendy L. Blake, Environmental Defense Section, P.O. Box 23986, Washington, D.C. 20026-3986, and should refer to *United States v. Conner et al.*, DJ Reference No. 90-5-1-4-385.

The proposed consent decree may be examined at either the Clerk's Office, United States District Court, Eastern District of Arkansas, Room 402, 600 West Capitol Street, Little Rock, Arkansas, or at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, D.C. 20005. Requests for a copy of the consent decree may be mailed to the Consent Decree Library at

the above address and must include a check in the amount of \$20.25.
