

the impact of his condition upon his ability to accept the responsibilities inherent in a DEA registrant, it is in the public interest to revoke his DEA Certificate of Registration."

The Acting Deputy Administrator agrees with Judge Randall that this is a close case. Respondent's lack of attention to detail, knowledge regarding the scheduling of controlled substances, and evidence of ongoing treatment for his codependency problems all justify revocation of his DEA Certificate of Registration as inconsistent with the public interest. However, the Acting Deputy Administrator also recognizes that Respondent practices in a poor rural community, that he is conservative in his prescribing of controlled substances and that he correctly answered the liability question on his 1995 renewal application. As a result, the Acting Deputy Administrator concludes that the public interest would be served by giving Respondent an opportunity to become educated regarding controlled substances and to receive continued treatment for his codependency problems while still being permitted to handle controlled substances.

Therefore, the Acting Deputy Administrator will stay the revocation for six months, during which time Respondent must present evidence to the Acting Deputy Administrator of his completion of a training course regarding controlled substances, and of his ongoing treatment for his codependency problems. In addition, Respondent must request modification, if necessary, of his 1995 renewal application to accurately reflect what schedules he wishes to be registered in to effectively treat his patient population. If Respondent does not submit this information within six months of the effective date of this order, a subsequent order will be issued lifting the stay and Respondent's DEA Certificate of Registration will be revoked. If Respondent does submit the information in a timely manner, the Acting Deputy Administrator will issue a subsequent order indicating that the conditions have been met, that the DEA Certificate of Registration is reinstated and renewed without limitations, and that Respondent shall acknowledge the revocation in response to the liability question on any future applications.

Accordingly, the Acting Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) and 0.104, hereby orders that DEA Certificate of Registration AR2127377, issued to Leonard E. Reaves, III, M.D., be, and it

hereby is, revoked, and any pending applications for renewal of such registration, be, and they hereby are, denied. It is further ordered that this order will be stayed for a period of six months from its effective date. If during the six month period, Respondent fails to provide the Acting Deputy Administrator with evidence of the completion of a course regarding controlled substances or of his ongoing treatment for his codependency problems, the stay will be removed and Respondent's DEA Certificate of Registration will be revoked and any pending application for renewal will be denied. This order is effective September 18, 1998.

Dated: August 13, 1998.

## **NUCLEAR REGULATORY COMMISSION**

[Docket No. 50-607]

### **McClellan Air Force Base; Notice of Issuance of Facility Operating License No. R-130**

The U.S. Nuclear Regulatory Commission (the Commission or the NRC) has issued Facility Operating License No. R-130 for the United States Air Force, McClellan Air Force Base (the licensee), to operate the training reactor and isotopes production, General Atomics (TRIGA) research reactor located on the licensee's site in Sacramento, California.

Facility Operating License No. R-130 authorizes a power level not in excess of 2300 kilowatts (thermal) and in the pulse mode, with pulse step reactivity insertion not in excess of \$1.75 (1.23 percent  $\Delta k/k$ .) The license will expire 20 years from its date of issuance.

The license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I. Those findings are set forth in the license. An opportunity for a hearing was afforded in the notice of the Proposed Issuance of Facility Operating License in the **Federal Register** on October 1, 1997 (62

FR 51491). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The facility has been inspected by representatives of the Commission who have determined that the facility was constructed in substantial conformity with the terms and conditions of the application, as amended.

The Commission has prepared a Safety Evaluation Report (NUREG-1630) regarding the operating license for the McClellan Air Force Base and, on the basis of that report, has concluded that the facility can be operated by the licensee without endangering the health and safety of the public.

The Commission also prepared an Environmental Assessment and Finding of No Significant Environmental Impact, which was published in the **Federal Register** on April 6, 1998 (63 FR 16830), for the operation of the reactor and has concluded that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see (1) the application for operating license of October 23, 1996, as supplemented; (2) Facility Operating License No. R-130; (3) the related Safety Evaluation Report (NUREG-1630); and (4) the Environmental Assessment and Finding of No Significant Environmental Impact of April 6, 1998. These items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, D.C. 20037.

Copies of NUREG-1630 may be purchased by writing the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, D.C. 20013-7982.

Dated at Rockville, Maryland, this 13th day of August 1998.
