BILLING CODE 7515-01-P

NATIONAL CREDIT UNION ADMINISTRATION

Agency Information Collection Activities: Submission to OMB for Review; Comment Request

AGENCY: National Credit Union
Administration (NCUA).

ACTION: Request for comment.

SUMMARY: The NCUA intends to submit the following reinstatement with change for an expired information collection to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35). This information collection is published to obtain comments from the public.

DATES: Comments will be accepted until October 19, 1998.

ADDRESSES: Interested parties are invited to submit written comments to NCUA Clearance Officer or OMB Reviewer listed below:

Clearance Officer: Mr. James L. Baylen (703) 518-6411, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314-3428, Fax No. 703-518-6433, E-mail: jbaylen@ncua.gov.

OMB Reviewer: Alexander T. Hunt (202) 395-7860, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Copies of the information collection requests, with applicable supporting documentation, may be obtained by calling the NCUA Clearance Officer, James L. Baylen, (703) 518-6411.

SUPPLEMENTARY INFORMATION: Proposal for the following collection of information:

OMB Number: 3133-0015.

Form Numbers: NCUA 4000, 4001, 4008, 4012, 4015, 4401, 9500, 9501, and 9600.

Type of Review: Reinstatement with changes of a previously approved collection for which approval has expired.

Title: Federal Credit Union Charter Application, Community Charter Conversion/Expansion Application, and Field of Membership Amendments.

Description: The Federal Credit Union (FCU) Act and Credit Union Membership Access (CUMA) Act set

forth the requirements for establishing a credit union based on a type of field of membership. The data collection is necessary to determine that the application for the new charter/amendment is in compliance with the FCU and CUMA Acts.

Respondents: Individuals or groups wishing to charter a credit union and credit unions wishing to expand their field of membership or convert their current type of field of membership to another.

Estimated No. of Respondents/Recordkeepers: 9,080.

Estimated Burden Hours Per Response: 2.75 hours.

Frequency of Response: On occasion as required.

Estimated Total Annual Burden Hours: 24,400.

Estimated Total Annual Cost: N/A.

By the National Credit Union Administration Board on August 13, 1998.

Becky Baker,

Secretary of the Board.

BILLING CODE 7535-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-607]

McClellan Air Force Base; Notice of Issuance of Facility Operating License No. R-130

The U.S. Nuclear Regulatory Commission (the Commission or the NRC) has issued Facility Operating License No. R-130 for the United States Air Force, McClellan Air Force Base (the licensee), to operate the training reactor and isotopes production, General Atomics (TRIGA) research reactor located on the licensee's site in Sacramento, California.

Facility Operating License No. R-130 authorizes a power level not in excess of 2300 kilowatts (thermal) and in the pulse mode, with pulse step reactivity insertion not in excess of \$1.75 (1.23 percent $\Delta k/k$.) The license will expire 20 years from its date of issuance.

The license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I. Those findings are set forth in the license. An opportunity for a hearing was afforded in the notice of the Proposed Issuance of Facility Operating License in the **Federal Register** on October 1, 1997 (62

FR 51491). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The facility has been inspected by representatives of the Commission who have determined that the facility was constructed in substantial conformity with the terms and conditions of the application, as amended.

The Commission has prepared a Safety Evaluation Report (NUREG-1630) regarding the operating license for the McClellan Air Force Base and, on the basis of that report, has concluded that the facility can be operated by the licensee without endangering the health and safety of the public.

The Commission also prepared an Environmental Assessment and Finding of No Significant Environmental Impact, which was published in the **Federal Register** on April 6, 1998 (63 FR 16830), for the operation of the reactor and has concluded that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see (1) the application for operating license of October 23, 1996, as supplemented; (2) Facility Operating License No. R-130; (3) the related Safety Evaluation Report (NUREG-1630); and (4) the Environmental Assessment and Finding of No Significant Environmental Impact of April 6, 1998. These items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, D.C. 20037.

Copies of NUREG-1630 may be purchased by writing the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, D.C. 20013-7982.

Dated at Rockville, Maryland, this 13th day of August 1998.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

*Director, Non-Power Reactors and
Decommissioning Project Directorate,
Division of Reactor Program Management,
Office of Nuclear Reactor Regulation.*

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-54]

Cintichem, Inc. Research Reactor; Environmental Assessment and Finding of No Significant Impact Regarding Termination of Facility License No. R-81

The U.S. Nuclear Regulatory Commission (NRC) is considering

issuance of an Order terminating Facility License No. R-81 for the Cintichem, Inc. (the licensee) Research Reactor located in Tuxedo, New York.

Environmental Assessment

Identification of Proposed Action

By application dated October 19, 1990, as supplemented January 11, 14, 28, February 19, March 8, April 24, May 21, June 25, July 17, August 6, and October 2, 1991, the licensee requested authorization to dismantle the 5 Megawatt Research Reactor, dispose of the component parts in accordance with the proposed decommissioning plan, and terminate Facility License No. R-81. An "Order Authorizing Dismantling of Facility and Disposition of Component Parts," dated November 21, 1991, was published in the **Federal Register** on November 27, 1991 (56 FR 60124). In addition, NRC required Cintichem to develop residual soil contamination criteria for use as unrestricted release criteria for the facility. These were submitted on October 22, 1992, and approved on August 26, 1993. On February 1, 1994, Cintichem requested approval of residual contamination criteria for five additional radionuclides that were not included in the original submittal. NRC approved the criteria for the five additional radionuclides on October 17, 1994. Unrestricted release criteria for surfaces were those described in NRC Regulatory Guide 1.86. These criteria were modified in October 1994 to increase the limits for tritium (H-3) and iron-55 (Fe-55) in accordance with NRC guidance. Cintichem was also required to demonstrate that the dose to a critical member of the public from all residual radioactive material on site did not exceed 10 millirem per year. In addition, the dose via the water pathway alone could not exceed 4 millirem per year.

Due to the large geographical size of the site and the considerable number of radiation survey data points recorded, the final radiation surveys were divided into five sequential phases. For each phase, Cintichem conducted radiation surveys using techniques recommended in NUREG/CR-5849, "Manual for Conducting Radiological Surveys in Support of License Termination", to show that unconditional release criteria were satisfied. The licensee completed the dismantlement and submitted final survey reports and addenda for the five phases dated January 26, 1995, March 3, 1995, March 26, April 19 and June 7, 1996, June 6 and 27, 1997, July 3 and 30, 1997, and September 22, 1997.

Representatives of the Oak Ridge Institute for Science and Education (ORISE), under contract to NRC, conducted five surveys of the Cintichem facility during the period April 1995 through August 1997. The surveys are documented in the following ORISE reports.

1. Confirmation Survey of the Exterior Areas of Buildings 1 and 2, May 1995
2. Confirmation Survey of the Phase 2 Areas of the Reactor Building, September 1996
3. Confirmation Survey of the Unaffected Land Areas, September 1996
4. Confirmation Survey of the Phase 4 Areas, May 1997
5. Confirmation Survey of the Phase 5 Areas, April 1998

In addition, an Addendum to the Phase 5 Confirmatory Survey Report, "Bedrock Dose Assessment Report", was submitted to the NRC on June 2, 1998.

NRC finds that the ORISE reports support the data developed in the licensee's final survey report, and that all measurements indicate the remaining facilities are suitable for unconditional release.

On May 27, 1998, Cintichem affirmed that all radioactive material stored on site had been removed from the facility. This was confirmed by inspection of the site by NRC and the State of New York on June 15, 1998.

The Need for Proposed Action

The proposed action is to release the facility for unrestricted access and use, and Facility License No. R-81 must be terminated.

Environmental Impact of License Termination

Results of Cintichem's surveys and the ORISE confirmatory surveys demonstrate that the facility meets the criteria for unrestricted use prescribed in the approved decommissioning plan as supplemented. The NRC finds that since these criteria have been met there is no significant impact on the environment and the facility can be released for unrestricted use.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in environmental impacts and would deny release of the site for unrestricted use and require continuance of facility license. The environmental impacts of the proposed action and the alternative action are similar. Since the reactor and component parts have been dismantled

and disposed of in accordance with NRC regulations and guidelines, there is no viable alternative to termination of Facility License No. R-81.

Agencies and Persons Consulted

The NRC staff consulted with the Director, Bureau of Pesticides and Radiation, Division of Solid and Hazardous Materials, New York State Department of Environmental Conservation regarding the proposed action, and the official had no comments.

Finding of No Significant Impact

Based upon the environmental assessment, the Commission concludes that the issuance of the Order will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this proposed action, see the licensee's submittal on decommissioning the facility, dated October 19, 1990 as supplemented. These documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC 20003-1527.

Dated at Rockville, Maryland this 13th day of August 1998.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactor and Decommissioning Project Directorate, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

Assessment and Recommendations for Fissile Material Packaging Exemptions and General Licenses; Availability of NUREG/CR

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory Commission (NRC) is announcing the availability of NUREG/CR-5342, "Assessment and Recommendations for Fissile Material Packaging Exemptions and General Licenses Within 10 CFR Part 71," dated July 1998.

ADDRESSES: Copies of NUREG/CR-5342 may be obtained by writing to the Superintendent of Documents, U.S. Government Printing Office, P.O. Box
