

aspects of the planned rule on children; and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This action is not subject to Executive Order 13045, entitled Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), because it does not involve decisions on environmental health risks or safety risks that may disproportionately affect children.

I. Enhancing the Intergovernmental Partnership Under Executive Order 12875

Under the executive order EPA must consult with representatives of affected State, local, and Tribal governments. The EPA consulted with State and local governments at the time of promulgation of subpart X (60 FR 32587), and no tribal governments are believed to be affected by this action. Today's changes are minor and will not impose costs on governments entities or the private sector. Consequently, the EPA has not consulted with State, local, and Tribal governments on this amendment.

For the reasons set out in the preamble, title 40, chapter I, of the Code of Federal Regulations is amended as follows:

PART 63—[AMENDED]

1. Section 63.542 is amended by adding a definition for pressurized dryer breaching seal as follows:

§ 63.542 Definitions.

* * * * *

Pressurized dryer breaching seal means a seal system connecting the dryer transition pieces which is maintained at a higher pressure than the inside of the dryer.

* * * * *

2. Section 63.543 is amended by revising paragraph (g) as follows:

§ 63.543 Standards for process sources.

* * * * *

(g) If the owner or operator of a blast furnace or a collocated blast furnace and reverberatory furnace does not combine the blast furnace charging process

fugitive emissions with the blast furnace process emissions and discharges such emissions to the atmosphere through separate emission points, then exhaust shall not contain total hydrocarbons in excess of 20 parts per million by volume, expressed as propane.

* * * * *

3. Section 63.544 is amended by redesignating paragraph (g) as paragraph (h) and adding a new paragraph (g) as follows:

§ 63.544 Standards for process fugitive sources.

* * * * *

(g) As an alternative to paragraph (a)(5) of this section, an owner or operator may elect to control the process fugitive emissions from dryer transition pieces by installing and operating pressurized dryer breaching seals at each transition piece.

* * * * *

4. Section 63.546 is amended by revising paragraph (a) as follows:

§ 63.546 Compliance dates.

(a) Each owner or operator of an existing secondary lead smelter shall achieve compliance with the requirements of this subpart no later than June 23, 1998.

* * * * *

5. Section 63.547 is amended by revising paragraph (b) as follows:

§ 63.547 Test methods.

* * * * *

(b) The following tests methods in appendix A of part 60 listed in paragraphs (b)(1) through (b)(4) of this section shall be used, as specified, to determine compliance with the emission standards for total hydrocarbons § 63.543(c), (d), (e), and (g).

(1) Method 1 shall be used to select the sampling port location to determine compliance under § 63.543(c), (d), (e), and (g).

(2) The Single Point Integrated Sampling and Analytical Procedure of Method 3B shall be used to measure the carbon dioxide content of the stack gases to determine compliance under § 63.543(c), (d), and (e).

(3) Method 4 shall be used to measure moisture content of the stack gases to determine compliance under § 63.543(c), (d), (e), and (g).

(4) Method 25A shall be used to measure total hydrocarbon emissions to determine compliance under § 63.543(c), (d), (e), and (g). The minimum sampling time shall be 1 hour for each run. A minimum of three runs shall be performed. A 1-hour average total hydrocarbon concentration shall be

determined for each run and the average of the three 1-hour averages shall be used to determine compliance. The total hydrocarbon emissions concentrations for determining compliance under § 63.543(c), (d), and (e) shall be expressed as propane and shall be corrected to 4 percent carbon dioxide, as described in paragraph (c) of this section.

* * * * *

6. Section 63.548 is amended by revising paragraph (e) introductory text and adding paragraph (k) as follows:

§ 63.548 Monitoring requirements.

* * * * *

(e) The bag leak detection system required by paragraph (c)(9) of this section, shall meet the specification and requirements of paragraphs (e)(1) through (e)(8) of this section.

* * * * *

(k) The owner or operator of a secondary lead smelter who uses pressurized dryer breaching seals in order to comply with the requirements of § 63.544(g) shall equip each seal with an alarm that will "sound" or "go off" if the pressurized dryer breaching seal malfunctions.
