### Substance Abuse and Mental Health Services Administration Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection

plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

#### Proposed Project: Survey of Substance Abuse Treatment Providers as Information Customers

Clinicians in the field of substance abuse treatment are increasingly turning to information products and services in managing the care of their patients, accessing new knowledge about treatment, and organizing their management systems. This study will help SAMHSA's Center for Substance Abuse Treatment (CSAT) to be better able to synthesize and disseminate knowledge by providing a representative assessment of the information products and services that currently exist in the substance abuse treatment industry.

Program directors and clinicians will be surveyed in a 15-minute telephone interview asking about their perceptions of information products and services that are currently being used, and their perceived need or interest in such new or improved products being developed and made available. The instrument that will be used to survey the providers and clinical staff will include a series of questions around a taxonomy and list of information products and services that are or might be used in the substance abuse treatment provider industry. A nationally representative target sample of 275 facilities will be drawn, and interviews will be completed with program facility directors and clinical staff. The estimated annualized burden for a one-year data collection period is summarized below.

	Number of respondents	Number of responses/respondent	Average burden/response (hours)	Total burden hours
Facility Directors .....	275	1	.25	69
Clinical Staff .....	467	1	.25	117
Total .....				176
